

## Directions for Use

**1 Scoop = 4 ounces**

**10 POUNDS TREATS APPROXIMATELY 40 ACRES**

### AGRICULTURE

#### Soil Applications

Apply 8 to 16 oz/Acre. Dissolve in sufficient water (1 to 2 gallons) to provide uniform application and then add liquid fertilizer or other tank mix partners. See instructions on this label (Preparing Tank Mix Solutions). Apply banded, in-furrow, side-dressed, or through flood, furrow or drip irrigation.

#### Foliar Applications

Apply 2 to 4 oz/Acre per application with fertilizer using sufficient water (1 gallon) for uniform coverage of the crop. See instructions on this label (Preparing Tank Mix Solutions).

#### STORAGE

This material is hygroscopic. Always replace the lid tightly after use. Store in a dry place in the original container.

Manufactured for and Distributed by:

8144 Walnut Hill Lane, Suite 987 - Dallas, TX 75231

# ESP50™

An all-purpose carbon and humic acid water-soluble powder derived from Menefee Humate®. Has excellent tank mix flexibility due to its formulation

10% Humic Acids

Derived from Humate

pH .....6.2

### NON-PLANT FOOD INGREDIENT

NET WEIGHT

25 LBS / 11.34 KG

Lot No. 160627

### PREPARING TANK MIX SOLUTIONS

Thoroughly clean all spray mixing and application equipment prior to and following each use. Unless directed otherwise by mixing instructions on the label of product to be tank mixed with ESP50™, follow these procedures:

1. Add the desired amount of water to the tank and begin agitation. Add desired spray adjuvant (wetting agent) if the application requires it to be used. ESP50™ will wet and disperse readily with-out an adjuvant.

2. Drip-irrigation add ESP50™ at a rate of 4 to 8oz/Acre. Foliar add ESP50™ at a rate of 2 to 4 oz/Acre.

3. Add liquid fertilizer. Do not tank mix with herbicides. Do not mix ESP50™ directly with undiluted tank mix partners until you have "jar tested" in a separate container the proportionate amount of ESP50™ to make sure the products are compatible prior to tank mixing. Agitate and let stand 10 minutes. Settling that does not disperse indicates an incompatible mixture.

4. Continue filling while agitating until all added products are thoroughly mixed into spray solution.

May be harmful if swallowed. May cause irritation of eyes, nose, throat, or skin. Avoid contact with eyes, skin or clothing. In case of contact with eyes, flush with plenty of water. Consult a physician if irritation persists. Notice: May cause staining on handler's apparel. Seller warrants that the product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with direction under normal conditions of use. Neither this warranty nor any other warranty of merchantability or fitness for a particular use, expressed or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or conditions not reasonably foreseeable to Seller, and Buyer assumes the risk of any such use.
