Earthtrend® Cal-Phos

0-6-0 7% Ca

PRODUCT INFORMATION

Earthtrend® Cal-Phos is a liquid plant food containing phosphorus and calcium, which is essential for membrane permeability, promoting root and leaf development and overall plant vigor. Earthtrend® Cal-Phos is designed to correct phosphorus and calcium deficiencies in plants.

GUARANTEED ANALYSIS

Available Phosphate (P_2O_5)	6.0%
Calcium (Ca)	7.0%

DERIVED FROM: Rock Phosphate

KEEP OUT OF REACH OF CHILDREN

PRECAUTIONARY STATEMENT

Wash thoroughly after handling this product. Do not ingest. Avoid contact with skin, eyes, and clothing. Wear waterproof gloves and eye protection such as goggles.

FIRST AID

IF ON SKIN: Take off contaminated clothing and wash before reuse. Rinse skin with plenty of water and soap. **IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. **IF INHALED:** Move person to fresh air. **IF SWALLOWED:** Call a poison control center or doctor immediately for treatment advice. Rinse mouth.

If symptoms persist, call a poison control or doctor for treatment advice.

DIRECTIONS FOR USE

SHAKE VIGOROUSLY BEFORE USING.

Always read entire label and follow use directions.

Earthtrend® Cal-Phos can be applied to all food and non-food crops such as brassica (cole), berries, citrus, cucurbits, field vegetables, fruiting vegetables, fruit trees, grapes (raisin, table and wine), leafy vegetables, root and tuber vegetables, row crops, strawberries, tree nuts, ornamental trees, shrubs, flowers, and containerized plants.

Mixing Instructions: For optimum plant uptake adjust application water pH between 6 and 6.5 after adding Earthtrend® Cal-Phos to the mixing tank. Apply as a soil drench or a foliar spray with conventional spray equipment or chemigation.

Foliar Application: 1 to 2 quarts per acre. Apply to plant foliage to point of run-off, throughout growing season as needed.

Soil Application: 1 to 6 gallons per acre. Apply in irrigation water until ground is saturated. Continue applications every 7 to 14 days at rate of 1 quart per acre through growing season as needed.

Nursery & Container: 1/2 to 1 ounce per gallon of water. Apply to plant foliage to run-off or as a soil drench, continue through the season as needed.

Compatibility: Always add Earthtrend® Cal-Phos last when mixing with sulfur products. Always conduct a compatibility jar test before mixing Earthtrend® Cal-Phos with new products.

NOTE: Perform a phytotoxicity test on a small plot before largescale application. To lower the risk of phototoxicity, applications should be made early morning or late evening.
