FIFRA 24(c) Special Local Need Label (SLN)

For Distribution and Use Only in the State of Oregon
Control of Spotted Wing Drosophila in Cherry

Entrust® SC

EPA Reg. No. 62719-621

SLN OR-120013

This label expires and must not be distributed or used in accordance with this SLN registration after December 31, 2022

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This state-specific Section 24(c) labeling must be in the possession of the user at the time of application.
- Follow all applicable directions, restrictions, and precautions on the EPA registered label for EPA Reg. No. 62719-621.

Active Ingredient:

spinosad (a mixture of spinosyn A and spinosyn D)	22.5%
Other Ingredients	77.5%
Total	100.0%

Contains 2 lb of active ingredient per gallon.

Keep Out of Reach of Children

Precautionary Statements

Environmental Hazards

This product is toxic to bees exposed to treatment for 3 hours following treatment. Do not apply this pesticide to blooming, pollen-shedding or nectar-producing parts of plants if bees may forage on the plants during this time period. This product is toxic to aquatic invertebrates. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters. Do not apply where runoff is likely to occur. Do not apply when weather conditions favor drift from treated areas. Drift and runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. Apply this product only as specified on the label.

Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read all Directions for Use carefully before applying.

Agricultural Use Requirements: Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 4 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

- Coveralls
- Chemical-resistant gloves made of any waterproof material
- Shoes plus socks

Application Timing: Treat when pests appear, targeting eggs at hatch or small larvae. Consult your Dow AgroSciences representative, extension service specialist, certified crop advisor or your state agricultural experiment station for any additional local use recommendations for your area.

Application Rate: Apply 4 to 6.4 fl oz of Entrust SC per acre as a foliar spray to control spotted wing drosophila. Use a higher rate in the rate range for moderate to severe pest infestations. Heavy infestations may require repeat applications, but follow resistance management guidelines.

Resistance Management: Rotate to a different class of insect control products after two applications of Entrust SC. Do not make more than three applications per acre per year of Group 5 insecticides (spinetoram and spinosad).

Specific Use Restrictions:

- **Preharvest Interval:** Do not apply within 3 days of harvest.
- **Treatment Schedule:** If three applications are made, one may be made up to 30 days PHI, another up to 10 days PHI, and the final application at 3 days PHI. If two applications are made, the time interval between applications is restricted to at least 7 days.
- Do not apply more than 6.4 fl oz of Entrust SC (0.1 lb ai) per acre per application.
- Do not apply more than a total of 12.8 fl oz of Entrust SC (0.2 lb ai) per acre within 10 days of harvest.
- Do not apply more than a total of 19.2 fl oz of Entrust SC (0.3 lb ai) per acre per year.
- Do not make more than three foliar applications per acre per year of Group 5 insecticides (spinetoram and spinosad). This restriction supersedes the number of applications on the label affixed to the container of Entrust SC.
- **Chemigation:** Do not apply this product through any type of irrigation system.
