

**CALCIUM12  
LIQUID CALCIUM CONCENTRATE**

CALCIUM 12 is formulated to help correct calcium deficiencies in fruit and vegetable crops susceptible to physiological calcium disorders. When combining CALCIUM 12 with GROW MORE, the recommended application rate is 1 gallon CALCIUM 12 with 2 lbs. GROW MORE 10-62-10 per acre in at least 100 gallons of water per acre.

**DIRECTIONS FOR USE**

1. Add amount of water to be used to tank.
2. Add CALCIUM 12 to water and mix.
3. Wash sprayer thoroughly after use.

**RECOMMENDED APPLICATION RATE**

FOLIAR : 1 gallon CALCIUM 12 per acre.  
DILUTION : 20-400 gallons water per acre.

Where farm management has maintained proper levels of calcium, maintenance applications of CALCIUM 12 at 2 quarts per acre may be recommended.  
For applications of CALCIUM 12 by aircraft, consult with GROW MORE Technical Services.

**WHEN TO APPLY**

**APPLES:** Repeat at 10 to 14-day intervals throughout growing season. Late season sprays followed by post-harvest application will be most effective.

**PEARS, PEACHES, NECTARINES AND OTHER STONE FRUIT:** June-August. Combine with Grow More 5-10-30 or 15-15-30 for maximum effect.

**GRAPES:** At 'soft-berry' until harvest.

**VEGETABLE CROPS:** At 10-12 true leaf stage.

[NOTE: Do not apply to tree fruit (apples, pears, etc.) within 14 days of spray oil application.

**CALCIUM 12**

**High Performance Concentrate  
Helps Prevent Bitter Pit**

**Density: 10.14 Lbs./Gals. at 68 °F**

**GUARANTEED ANALYSIS**

Calcium (Ca) .....12.0%  
12.0% Chelated Calcium

Derived from Calcium Chloride and Citric Acid.

**REPEAT APPLICATIONS**

Due to the general immobility of calcium in plants, multiple applications of CALCIUM 12 are recommended for all crops. The number of sprays recommended will depend upon the severity of a calcium deficiency known to exist or that has been diagnosed by analysis. Obtain further advice from your GROW MORE Technical Services.

**EQUIPMENT**

**AIRCRAFT:** CALCIUM 12 may be applied by aircraft. Use 1 quart per 5 gallons of water per acre per application.

**GROUND RIG:** Use up to 1 quart of CALCIUM 12 in a minimum of 25 gallons of water.

**DILUTE SPRAY:** Apply the required amount of CALCIUM 12 in enough water for good coverage.

**COMPATIBILITY:** CALCIUM 12 is compatible with most all pesticides. CALCIUM 12 should not be combined with basic zinc sulphate, zinc oxide, basic copper sulphate, fixed copper (except C-O-C-S) and bordeaux. Do not use with liquid phosphate.
