

DIRECTIONS

FERT-ALL may be applied with pesticides. May also be used as an alkaline water acidifier (buffer). Use 2-4.5 liters per 380 liters of spray water. Add to tank before adding pesticides. This will help prevent hydrolysis. When plants are under moisture stress, avoid foliar application of FERT-ALL. Plants more efficiently utilize foliar nutrients when applied during post irrigation or post rainfall conditions. The best time to apply FERT-ALL is in the early morning or late evening.

FIELD, VEGETABLE & ROW CROPS: As a foliar spray, use 6-18 liters per hectare. For best results, make multiple applications of 1/2-1 liter per application at 10-14 days interval during the rapid growth stages. When applied to soil with certain liquid fertilizer, dry fertilizer, in irrigation water or by itself, use 6-23 liters per hectare. These rates may be applied to sorghum, corn, cotton, alfalfa, millet, hops, sugarbeets, tomatoes, beans, watercress, parsley, lettuce, celery, radishes, peppers, potatoes, melons and onions.

FRUITS, VINE & NUT CROPS: As a foliar spray, use 5-27 liters per hectare. For best results, make multiple applications of 4.5-14 liters per hectare at 10-14 days interval during the rapid growing and/or fruiting stage. For citrus such as oranges, melons and grapefruits, apply foliar sprays when leaves first appear. For walnuts, soil applications are preferred. For cherries, foliar sprays may injure certain varieties (contact GROW MORE). For apples and pears, do not apply as a concentrate spray. The following rates may be applied to strawberries, pecans, grapes, avocados, peaches, plums, prunes, almonds, nectarines and ornamentals.

MAINTENANCE APPLICATION - 1 TO 3 QUARTS. PER ACRE
(2 to 9 liters per hectare)

LIGHT TO MEDIUM DEFICIENCY - 2 TO 6 QUARTS. PER ACRE
(4.5 to 14 liters per hectare)

MEDIUM TO SEVERE DEFICIENCY - 4 TO 12 QUARTS. PER ACRE
(9 to 27 liters per hectare)

Made in U.S.A.

Liquid

FERT-ALL

Copper

Multi-Purpose For Soil & Foliage

■ 1 Gallon ■ 2.5 Gallons ■ 10 Liters
■ 4x1 Gallon ■ 2x2.5 Gallons ■ 2x10 Liters

COMMERCIAL TURF AREAS: Use 1 liter per 93 sq. meters.
COMMERCIAL NURSERY & GREENHOUSE: For field-grown plants and greenhouse benches, use 1 liter per 93 sq. meters.

GUARANTEED ANALYSIS

Sulfur (S) ----- 2.00%

Copper (Cu) ----- 5.00%

Derived from Lignosulfonic Acid & Copper Oxide.

EQUIPMENT

AIRCRAFT: FERT-ALL may be applied by aircraft. Use 1 quart per 5 gallons of water per acre per application.

GROUND RIG: Use up to 1 quart of FERT-ALL in a minimum of 25 gallons of water.

DILUTE SPRAY: Apply the required amount of FERT-ALL in enough water for good coverage.

DRIP IRRIGATION: For best result, apply the required amount of FERT-ALL in multiple applications extended over the growing season of the crop 1 to 2 weeks apart. Do not apply in combination with phosphate.

COMPATIBILITY: FERT-ALL is compatible with most all pesticides. FERT-ALL should not be combined with basic zinc sulphate, zinc oxide, basic copper sulphate, fixed copper (except C-O-C-S) and bordeaux. Do not use with liquid phosphate.

CAUTION: KEEP OUT OF REACH OF CHILDREN
