### DIRECTIONS FOR USE

The use of FOAM BREAKER ULTRA-S can control foaming of spray mixtures. The reduction of foam can decrease mixing and filling times and reduce material loss caused by foaming over of spray tanks. It can reduce risks of unwanted and unsightly vegetation kills or contamination caused by foaming over.

For foam reduction when mixing spray solutions, add FOAM BREAKER ULTRA-S at the rate of 1-2 ounces per 100 gallons of solution. Water hardness, temperature and spray tank mixture may call for more or less. Adjust the rate until the desired control is achieved. Add FOAM BREAKER ULTRA-S to the partly water-filled tank first and agitate well before adding other products to the spray solution.

If foaming should occur after spray mixture is in tank, FOAM BREAKER ULTRA-S can be applied directly to the surface using the trigger sprayer for fast foam knockdown.
