labeling.**

For control of anthracnose on mangoes.

CROP	APPLICATION INFORMATION	DISEASE	USE DIRECTIONS
Mangoes	3 lbs a.i./A (3.94 lbs product /A)	Anthracnose (Colletotrichum gloeosporioides)	<p>Apply in sufficient water to obtain adequate coverage of structures susceptible to anthracnose (flowers and fruit), generally at least 250 gallons per acre. Applications should be made with hydraulic air-assisted sprayers which are transported across the ground with tractors or other similar means, and which are properly calibrated to deliver uniform placement of spray preparations. Begin applications at flowering and repeat at not less than 10 day intervals until conditions no longer favor disease. Applications may be continued until the day of harvest if required.</p> <p>Do not apply more than 10 applications per year (30 lbs active ingredient or 39.4 lbs product per acre).</p>

DO NOT APPLY THIS PRODUCT THROUGH ANY TYPE OF IRRIGATION SYSTEM.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 24 hours.

NOTE: For additional information, refer to the Agricultural Use Requirements on the Ferbam Granuflo Label (EPA Registration no. 45728-7)
