DIRECTIONS FOR USE

Ground Application

Use sufficient spray volume and pressure to ensure complete coverage of the target. A minimum spray volume of 15 gal/A is recommended. On large weeds and/or dense foliage use a minimum of 20 gal/A, to ensure thorough coverage of weed foliage.

The use of standard flat fan nozzles will result in the most effective post-emergence application of Flexstar. Use nozzles that are set up to deliver a medium quality spray, according to the ASABE S-572.1 standard.

For tank-mixes containing Flexstar and either dicamba or 2,4-D, nozzles that are set up to deliver coarse, very coarse, extremely coarse or ultra-coarse sprays may be used. The required spray quality should be determined by reference to the instructions given on the label of the dicamba- or 2,4-D-containing tank-mix partner, for these tank-mixes. For all other tank-mixes containing Flexstar, use nozzles that deliver a medium quality spray.
