

Floragard[®]

Cut Flower Preservative

GENERAL INFORMATION

FLORAGARD is a cut flower preservative that makes cut flowers, flower arrangements and bouquets last longer. The fresh cut flowers and plant parts placed in a **FLORAGARD** solution are supplied with the mineral nutrients that extend the vase or container life and even increase the bloom size. **FLORAGARD** also discourages microbial growth in the container that may be harmful to the cut flowers and shorten their container life.

FLORAGARD can be used for most cut flowers including Alstroemeria, Anemone, Aster, Baby's Breath, Calla, China Aster, Chrysanthemum, Carnation, Cornflowers, Cosmos, Daffodil, Dahlia, Daisy, Delphinium, Dianthus, Digitalis (Foxglove), Gerber Daisy, Gladiolus, Godetia, Iris, Larkspur, Marigold, Phlox, Scabiosa, Spider Flower, Strawflower, Sunflower, Sweet Pea, Tulips, etc.

DIRECTIONS FOR USE

SHAKE WELL BEFORE USING

Distilled Water: Mix 1.5-2 ounces of **FLORAGARD** with 1 gallon of distilled water. **Tap Water:** Mix 4 ounces of **FLORAGARD** with 1 gallon of tap water.

Use **FLORAGARD** each time water is added to the holding container or is replaced. One gallon of **FLORAGARD** makes 32 gallons of ready-to-use solution.
