

FLOWABLE SULFUR 52%

DIRECTIONS FOR USE

Because of AGRI-TREND LLC FLOWABLE SULFUR 52%'s superior suspending qualities and small particle size, it can be used effectively thru irrigation systems where agitation in the supply tank can be provided.

Pour recommended amount of AGRI-TREND LLC FLOWABLE SULFUR 52% into partly filled spray tank. Add balance of water to fill tank. Keep agitated while filling and spraying. Add compatible pesticide last.

APPLICATION RECOMMENDATIONS

AGRI-TREND LLC FLOWABLE SULFUR 52% can be mixed and applied with liquid fertilizer or water. Apply 2 to 5 gallons of product per acre. If other forms of sulfur are used, cut back above rates accordingly.

AGRI-TREND LLC FLOWABLE SULFUR 52% is recommended for application to the following crops:

Alfalfa	Cauliflower	Lentils	Peas	
Almonds	Carrots	Lettuce	Peppers	Strawberries
Apples	Celery	Milo	Plums	Sugar Beets
Barley	Citrus	Mint	Pomegranates	Sweet Corn
Beans	Corn	Nectarines	Potatoes	Tomatoes
Berries	Cotton	Onions	Prunes	Turf
Broccoli	Grapes	Peaches	Sorghum	Turnips
Cabbage	Hops	Pears	Soybeans	Walnuts
				Wheat

NOTICE

AGRI-TREND LLC warrants that this product conforms to the chemical description on the label thereof and is reasonably fit for the purposes stated on such label only when used in accordance with the directions under normal use conditions. It is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness, or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of AGRI-TREND LLC. In no case shall AGRI-TREND LLC be liable for consequential, special or indirect damages resulting from the use or handling of this product. All such risks shall be assumed by the buyer. AGRI-TREND LLC makes no warranties of merchantability or fitness for a particular purpose nor any other express or implied warranty except as stated above.

AT-0084

A fertilizer supplement for foliar and soil application.

ACTIVE INGREDIENT:

Sulfur (S) 52%

Derived from Elemental Sulfur

NOTE: The addition of this product will buffer the final solution. The pH will drop 1 to 2 digits depending on water hardness and rates.

NOTE: When mixing solubles with other chemicals, all chemical labels should be read in their entirety to ensure both chemical compatibility, and compatibility based on the pH.

**Contains 6.2 lbs. Sulfur Per Gallon.
Weight per gallon (3.785 L) 12 lbs. (5.45 kg)**

Net Contents:

- 2.5 Gallons (9.462 L); 30 lbs. (13.62 kg)
- 5 Gallons (18.925 L); 60 lbs. (27.24 kg)

DIRECTIONS FOR MIXING BEFORE USING, STIR UNTIL SMOOTH

Pour recommended amount in partially filled spray tank. Keep agitator running during filling and spraying operation. DO NOT ALLOW MIXTURE TO STAND. Failure to maintain agitation will cause AGRI-TREND LLC FLOWABLE SULFUR 52% to settle and may necessitate manual stirring to redistribute.

The strong adhesive properties of AGRI-TREND LLC FLOWABLE SULFUR 52% acts as a sticker on the plant and the sticking characteristics necessitates the flushing of equipment with water after each day's use. Sulfur in any form is corrosive material. TO REDUCE THE EFFECT, EQUIPMENT SHOULD BE FLUSHED DAILY.

LOT NUMBER

61203

CAUTION:

KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Avoid breathing spray mist. May cause irritation of nose, throat or skin. Avoid contact with eyes, skin and clothing. Do not contaminate feed and food stuffs. Do not apply to any area not specified on label. Do not reuse empty container. Wash thoroughly with water and detergent. Puncture, make unusable. Dispose of in a safe place.

FOLIAR SPRAY RECOMMENDATIONS

CITRUS: For nutritional needs apply 4 to 16 pints per acre with sufficient amount of water for thorough coverage per application.

FIELD AND VEGETABLE CROPS: Apply 2 to 6 pints per acre in at least 25 gallons of water. Application should be made early in the growing season. This treatment should be repeated if crops continue to show sulfur deficiencies.

ORCHARD CROPS: Apply 2 to 6 pints per acre in at least 100 gallons of water. Application should be made early in the growing season. This treatment should be repeated if crops continue to show sulfur deficiencies.

GRAINS: Apply 2 to 4 pints per acre in sufficient water to assure thorough coverage. First application at tilling. Second application 14 to 21 days after first application.

When foliar spraying AGRI-TREND LLC FLOWABLE SULFUR 52% through a conventional sprayer, use a minimum of 25 gallons of water per acre.

When foliar spraying AGRI-TREND LLC FLOWABLE SULFUR 52% with low volume equipment, 10 gallons of water per acre is recommended.

For best results spray when the crop is in an active growing state, after irrigation or natural rainfall. Spray early in the morning or late afternoon. Mid-day sprays may not be effective because of excessive moisture evaporation.

Do not use on cucurbits (i.e., squash, cucumbers or melons) as it may cause injury.

CAUTION: Some fruits and other plants are susceptible to injury from sulfur under certain climatic conditions. The user is advised not to use sulfur on any crop unless local use has proven that sulfur is safe in the locality.

During periods of high temperature, sulfur may burn foliage and fruit. Do not make sulfur applications at excessively high temperature. Do not use AGRI-TREND LLC FLOWABLE SULFUR 52% with oil or within 3 weeks of an oil application.
