# Foam Arrest™

## GENERAL INFORMATION:

Foam Arrest is formulated to aggressively neutralize foam in all pesticide and / or fertilizer tank mixes regardless of spray solution pH. Unlike ordinary defoamers, Foam Arrest's unique blend of formulation aids and emulsifiers will not precipitate in low pH spray solutions, making it ideal for use with all glyphosate formulations.

## DIRECTIONS FOR USE:

Foam Arrest's unique formulation offers three options to eliminate foam:

**Antifoam:** Use Foam Arrest to prevent foam formation by adding it to the spray solution first, while agitating, and before adding pesticides.

**General Defoamer:** Use Foam Arrest as a general defoamer by adding it to the spray solution during agitation while foam formation is active.

**Spot Defoaming:** Use Foam Arrest through its trigger sprayer applicator to take out established foam.
