

FourGround™

DESCRIPTION

FourGround™ is a soil applied liquid nutrient product designed to provide Zinc (Zn), Manganese (Mn), and Copper (Cu) that may be deficient in the soil or plant.

DIRECTIONS FOR USE

FourGround is for soil applications via broadcast sprays, injection, or irrigation water run. Tank mixes with Phosphate fertilizers may require acidification to achieve long term compatibility. In many cases adding 5 to 10% water to prior to mixing with other concentrated fertilizers may be required to achieve a homogeneous tank mix. A blend of 1:1 with water prior to mixing with calcium fertilizers will enhance long term stability of the blend. When mixing FourGround with other materials, always establish compatibility using the standard quart jar method prior to tank mixing.

Inject with a drip sprinkler irrigation system. May be sprayed under the drip line of the plants or knifed in prior to a sprinkler irrigation or surface irrigation. Apply enough water to move product into the areas of active rooting, but not excessive amounts that may leach the product below the root system.

HAZARD STATEMENTS Causes skin irritation. Causes serious eye damage.

PRECAUTIONARY STATEMENTS Wash hands thoroughly after handling. Wear eye protection/face protection/ protective gloves. **IF ON SKIN:** Wash with plenty of water. **IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing. Immediately call a POISON CENTER/ doctor/if feeling unwell. If skin irritation occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse.
