FOURSOME® Plus

Turf Pigment

- Can be used to improve heat tolerance by reducing the stress on the plant and increasing the strength and plant durability.
- A stable pigment designed to improve the Turf Aesthetic value which can be used as visual spray pattern indicator for applicators. Can assist with making spray applications of turf chemicals, fertilizer applicators, plant growth regulators, herbicides, insecticides and plant protectants with more consistent results.
- When applied in late winter/early spring can improve the consistency of spring green up and Turfgrass transition.

APPLICATION RATE

For optimal performance, use from 15 to 20 oz. of FOURSOME Plus Turf Pigment per acre of turf with 16 oz. suggested as the initial rate.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. Do not incinerate nor incinerate wholly or partly in water. Do not contaminate water, food, or feed by storage or disposal. Do not incinerate wholly or partly in water.

PRODUCT DESCRIPTION

FOURSOME Plus Turf Pigment is a unique formulation pigment additive designed to enhance and extend the aesthetic appearance of the turf site following a pesticide application and for use as a spray pattern indicator.

APPLICATION RATE

For optimal performance, use from 15 to 20 oz. of FOURSOME Plus Turf Pigment per acre of turf with 16 oz. suggested as the initial rate.

DIRECTIONS FOR USE

1. Fill sprayer tank one-half to two-thirds volume of water.
2. With agitation and avoiding physical order of addition, add FOURSOME Plus Turf Pigment after dry dispersible granules and before water-soluble pesticide formulations.
3. Mix FOURSOME Plus Turf Pigment to fully disperse and mix into the spray solution before adding additional products.
4. Make application of pesticide solution mix to target site at rate specified on pesticide manufacturer’s label.
5. After application, clean sprayer tank as per pesticide manufacturer’s label.

PRECAUTIONARY STATEMENTS

Wash hands thoroughly after handling. This product does not meet the regulatory definition of a hazardous chemical under 29 CFR 1910.1200. However, good industrial hygiene practices should be used in the management and handling of the product. When applied, when in late winter/early spring can improve the consistency of spring green up and Turfgrass transition.

STORAGE AND DISPOSAL
