

FIFRA Section 2(ee) Recommendation

This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by the EPA.

FENPYROXIMATE	GROUP	21A	INSECTICIDE
---------------	-------	-----	-------------

EPA Reg. No. 71711-4

Crop: Almond and Pistachio

Pest: Gill's Mealybug

States: California Only

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This labeling and the EPA approved container label must be in the possession of the user at the time of application. Read the label affixed to the container for FujiMite® SC Miticide/Insecticide before applying. Use of FujiMite SC Miticide/Insecticide according to this labeling is subject to the use precautions and limitations imposed by the label affixed to the container for FujiMite SC Miticide/Insecticide.

For Control of Gill's Mealybug in Almond and Pistachio

- Apply FujiMite SC Miticide/Insecticide at 2.0 to 3.0 pints (0.105 to 0.158 lb ai) per acre.
- Apply by ground using 200 GPA or an adequate spray volume to obtain good spray coverage and obtain direct contact with the insect.
- Apply FujiMite SC Miticide/Insecticide with a silicone, NIS, or mineral oil type spray adjuvant to improve coverage.
- Use the higher rate for heavy infestations.
- FujiMite SC Miticide/Insecticide is effective on all developmental stages including adults.
- Application should be made at peak crawler emergence when mealybugs are exposed on the clusters and foliage, typically from early to mid-June in the first generation.
- A follow up application may be made targeting second generation crawler hatch in late July to early August.
- More than one application (limited to no more than 2 per year) may be necessary to achieve complete control.
- For best results, tractor speed should not exceed 2 MPH.
