RESTRICTED USE PESTICIDE

Due to Ground and Surface Water Concerns

For retail sale to and use only by Certified Applicators, or persons under their direct supervision, and only for those uses covered by the Certified Applicator's certification.

This product is a restricted use herbicide due to ground and surface water concerns. Users must read and follow all precautionary statements and instructions for use in order to minimize potential for atrazine to reach ground and surface water.

FulTime®

EPA Reg. No. 62719-371

Rotational Crop Restrictions After Final Application

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This label must be in the possession of the user at the time of pesticide application.
- Read the label affixed to the container for FulTime® herbicide before applying. Follow all applicable use directions and precautions on the EPA-registered label.
- Use of FulTime according to this supplemental labeling is subject to all restrictions and limitations imposed by the label affixed to the product container.

Directions for Use

Refer to product label for General Use Precautions, Mixing and Application instructions.

Rotational Crop Restrictions

When tank mixing with other herbicides, follow the most restrictive crop rotation guidelines on the label of each product used. The following rotational crops may be planted as indicated:

Crop	Interval
Corn (1)	Anytime – 0 Months After Application
Sorghum, Soybean (2)	Spring Following Application
Alfalfa, Barley, Dry beans (3), Lupin (4), Millet, pearl or proso, Oats, Pea (6), Potatoes, Rye, Sugar beets Sunflower, Tobacco (7), Triticale, Wheat, Wild rice	15 Months After Application (5)

Numbers within parentheses (-) in the table refer to Specific Rotational Crop Requirements or crop descriptions below.

- (1) If crop treated with FulTime is lost, corn may be replanted immediately. Do not make a second application of FulTime. Do not apply FulTime after June 10, unless only corn will be planted the following year.
- (2) Due to the risk of atrazine carryover, injury to soybeans may occur the year following corn when planted in north central and northwest Iowa, south central and southwest Minnesota, northern Nebraska and southeast South Dakota on soils having a calcareous surface layer and relatively high pH.
- (3) Dry beans includes: adzuki, kidney, lima, navy, pinto
- (4) Lupin includes: grain, white, white sweet
- (5) Approved rotation crops list does not include any species of succulent beans and peas.
- (6) Pea includes: blackeyed, chick, cow, Crowder, field, pigeon, Southern
- (7) Because of atrazine carryover, injury may occur to tobacco.
