

Section 24(c) Special Local Need Label

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF OREGON

Fusilade® DX Herbicide
For Certain Fine Fescues Grown for Seed Only

EPA Reg. No. 100-1070
EPA SLN No. OR-950013

This label for Fusilade DX Herbicide is valid until December 31, 2021 or until otherwise amended, withdrawn, cancelled, or suspended.

Active Ingredient:

Fluazifop-P-butyl

Butyl (R)-2-[4-[[5-(trifluoromethyl)-2-pyridinyl]oxy]

phenoxy]propanoate*24.5%

Other Ingredients:75.5%

Total:100.0%

KEEP OUT OF REACH OF CHILDREN
CAUTION

DIRECTIONS FOR USE

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This label must be in the possession of the user at the time of application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA-registered label.

Environmental Hazards: This product is toxic to fish and aquatic invertebrates. Do not apply to areas where runoff into water bodies is expected. This product is toxic to grasses and other monocot plants. Minimize exposure to non-target plants and do not apply when weather conditions favor drift from target areas. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters.

Ground Water Advisory: Fluazifop-P-butyl is known to leach through soil into ground water under certain conditions as a result of label use. This chemical may leach into ground water if used in areas where soils are permeable, particularly where the water table is shallow.

Surface Water Advisory: This product may impact surface water quality due to runoff of rain water. This is especially true for poorly draining soils and soils with shallow ground water. This product is classified as having high potential for reaching surface water via runoff for several months or more after application. A level, well-maintained vegetative buffer strip between areas to which this product

is applied and surface water features such as ponds, streams, and springs will reduce the potential loading of fluazifop-P-butyl from runoff water and sediment. Runoff of this product will be reduced by avoiding applications when rainfall is forecasted to occur within 48 hours.

Chemigation: Do not apply this product through any type of irrigation system.

REI: Observe a Restricted Entry Interval (REI) of 12 hours.

USE DIRECTIONS

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

Weeds Controlled

For downy brome (cheatgrass) (*Bromus tectorum*), quackgrass (*Agropyron repens*) and bentgrass (*Agrostis* sp.) control in Creeping Red, Chewings and Hard Fescue varieties grown for seed in Oregon.

Application Instructions

Fall Application: Apply Fusilade DX Herbicide at 8 oz per acre to actively growing downy brome in the 2 to 4 inch stage. Apply at 12 to 16 oz per acre to actively growing quackgrass or bentgrass in the 6 to 10 inch stage. Make a second application of 12 to 16 oz per acre on the perennial grasses before they reach 10 inches of regrowth.

Spring Application: Apply Fusilade DX Herbicide at 8 to 16 oz per acre to actively growing grasses. Downy brome in the 2 to 4 inch stage can be controlled by the lower rate but larger, established grasses (4 to 6 inches) may need the higher rate for adequate control. Use 12 to 16 oz per acre in quackgrass and bentgrass in the 6 to 10 inch stage and a second application at the same rates before they reach 10 inches of regrowth.

Restrictions: (1) Do not apply Fusilade DX Herbicide after fescue grass seedhead develops into the boot stage. (2) Treated fields may not be grazed or harvested for forage until after harvesting grass seed crop.
