GENERAL INFORMATION

Gravity S 20-20-20 UMAXX with Micros is a 100% soluble fertilizer designed to provide nutrition for growing plants, such as turf and ornamentals. Gravity S 20-20-20 UMAXX with Micros is specifically formulated to provide a rapid plant response through several forms of nitrogen. This product works as the standard or base product in a plant nutrition program.

A number of variables influence the rate of application necessary to prevent or correct a specific deficiency. For best results, follow good agronomic practices and conduct soil and tissue tests. Additional fertility may need to be supplied from other sources. For specific recommendations for your plants, consult your state's recommendations or your local plant expert. Information regarding the contents and levels of metals in this product is available on the internet at: <http://www.aapfco.org/metals.html>

DIRECTIONS FOR USE - READ ENTIRE LABEL BEFORE USING

Gravity S 20-20-20 UMAXX with Micros can be tank mixed. If you are unfamiliar with the product, a jar test should be used to confirm compatibility and a small area should be treated with the product prior to large scale application. Gravity S 20-20-20 UMAXX with Micros should not be mixed with strong acids as product degradation will occur and the fertilizer will precipitate. Apply only as directed during the growing season.

CAUTION: Over-application or excessive use of boron or use on plants other than those listed as having a boron response, can result in boron toxicity and may cause serious crop injury.

Molybdenum can be toxic to plants. Make sure your soil indicates the need for additional molybdenum prior to seed treatment or fertilizer use. The application of fertilizing materials containing molybdenum (Mo) may result in forage crops containing levels of molybdenum (Mo) which are toxic to ruminant animals.

For Turfgrass Applications: Do not apply near water, storm drains, or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn/garden, and sweep any product that lands on the driveway, sidewalk, or street, back onto your lawn/garden.

In **Virginia**, this lawn fertilizer, which contains phosphorous, is intended only for nonagricultural use on (i) turf during its first growing season, (ii) turf areas being repaired or renovated, and (iii) turf where a soil test performed within the last 3 years indicates a phosphorous deficiency. This fertilizer is not intended for the routine maintenance of turf.

In **Maryland and Pennsylvania**, this product is to be used as a seed starter fertilizer for newly established lawns or turf only. In Maryland, apply this product at no more than 0.7 lbs. Nitrogen per 1,000 sq. ft.

GOLF COURSES Gravity S 20-20-20 UMAXX with Micros should be applied at 0.25 to 3 lbs per 1,000 sq. ft. every 7 to 21 days as needed during the growing season. Spray volumes can range from 1 to 4 gallons per 1,000 sq. ft. for adequate coverage. Gravity S 20-20-20 UMAXX with Micros may be used on greens, tees, fairways, roughs, and other turf areas composed of turfgrasses including, but not limited to: Bluegrass, Perennial Ryegrass, Tall Fescue, Annual Bluegrass, Bentgrass, Bahiagrass, St. Augustinegrass, Zoysiagrass, Centipedegrass, Seashore Paspalum, and Bermudagrass. For best results do not irrigate or mow until sprayed area has completely dried.

LAWNS AND OTHER TURF AREAS Gravity S 20-20-20 UMAXX with Micros should be applied at 1 to 3 lbs per 1,000 sq. ft. every 7 to 21 days as needed during the growing season. Spray volumes can range from 0.5 to 4 gallons per 1,000 sq. ft. for adequate coverage. Gravity S 20-20-20 may be used on all turfgrasses including but not limited to: Bluegrass, Perennial Ryegrass, Tall Fescue, Annual Bluegrass, Fine Fescue, Bentgrass, Bahiagrass, St. Augustinegrass, Zoysiagrass, Centipedegrass, Seashore Paspalum, and Bermudagrass. For best results do not irrigate or mow until sprayed area has completely dried.

TREES AND ORNAMENTALS Gravity S 20-20-20 UMAXX with Micros should be applied at 1 to 3 lbs per 1,000 square feet of landscaped area every 7 to 21 days as needed during the growing season. For container grown products, trees or other ornamentals apply a foliar spray or soil drench at a rate of 3 to 10 lbs. per 100 gals of water. Prior testing is required before applying to open flowers.
