

## Handling and Formulation

Pounds of N per Gallon at 68°F	2.5
Gallons per Ton	187.5
Weight per Gallon	10.66 lbs/gal
Density	1.277

Appearance and Color            Greenish Yellow

Odor                                        None

Storage Stability at 77°F        approximately 2 yrs.

## Typical Properties

Specific Gravity (77°F)	1.279
pH	9.1

Salt Out Temperature (°F)            0

Freezing Point (°F)	0
Viscosity, Centipoises @ 25°C	70

Application Rate		Total Nitrogen Foliar applied N	Equivalent to Soil applied N
Gallons	Ounces	Pounds	Pounds
1	128	2.66	16.0
1.5	192	4.0	24.0
2	256	5.2	31.0

**Do not make foliar applications to Sulfur-sensitive crops, such as:**  
**Melons**  
**Apricots**  
**Cucumber**  
**Squash**

# GREENFEED SULFUR 25-0-0 with 5% Sulfur

## A FOLIAR SLOW RELEASE NITROGEN

### Guaranteed Analysis:

**Total Nitrogen (N).....25%**  
    6.25% Urea Nitrogen  
    18.75% Other Water Soluble Nitrogen\*  
**Sulfur (S).....5%**

Derived from Polymethylene Urea, Monomethylol Urea, Methylene Diurea, Urea, and Elemental Sulfur

\*18.75% Slowly Available Nitrogen derived from Polymethylene Urea, Monomethylol Urea and Methylene Diurea

Density: 10.66 lbs./gallon (1.277 kg/L) @ 68°F  
 **Net Contents: 5 gallons (18.92 L)**  
    **Net Weight: 53.3 lbs. (24.175 kg)**  
Density: 10.66 lbs./ gallon (1.277 kg/L) @ 68°F  
 **Net Contents: 275 gal (1041 L)**  
    **Net Weight: 2931.5 lbs. (1329.7 kg)**

**FOR AGRICULTURAL USE  
KEEP OUT OF REACH OF CHILDREN  
Urea Fertilizer/Sulfur**

## WARNING

**Harmful if swallowed. Causes skin and eye irritation.**

## PRECAUTIONARY STATEMENTS

Avoid contact with eyes and prolonged contact with skin. Avoid breathing dust/fumes/gas/mist/vapors/spray. Wash thoroughly after use. Wear safety glasses and resistant gloves. Do not store in unmarked containers. Use outdoors and in well-ventilated areas. Keep away from heat and other ignition sources. Dispose of absorbed material in accordance with all federal, state and local regulations.

## FIRST AID

Eyes or skin-flush with water. For eyes, call a physician. Ingestion-drink large volumes of water and induce vomiting by placing fingers or spoon at back of throat. Call a physician or local Poison Control Center. Consult Safety Data Sheet.

## STORAGE & BLENDING INSTRUCTIONS

Use in approximately 2 yrs from date of purchase. Store unblended in closed container between 0°F and 90°F. Dilute with water and blend with other nutrients and pesticides only at the time of application and in the amounts required. When blending: always make a jar test to determine compatibility.

## Humectant

GREENFEED SULFUR under low humidity conditions will rewet from dew or leaf moisture. The humectant's effect will help reduce spray droplet evaporation before and after deposit to the plant. This is of special value as GREENFEED SULFUR spray will be absorbed into the plant for optimum efficiency.

## Reduction in Spray Drift

Application of GREENFEED SULFUR by ground or air may effectively reduce drift due to viscosity of GREENFEED SULFUR at 53.3 lbs compared to water at 8.6 lbs/gal.
