Grasp[®] SC

EPA Reg. No. 62719-500

2(ee) Recommendation[†]

For Distribution and Use Only Within the State of Louisiana

Water Management in Water Seeded Rice

ATTENTION

[†] This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by the EPA.

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- Read the label affixed to container for Grasp[®] SC herbicide before applying. Carefully follow all precautionary statements and applicable use directions.
- Except as specified in this product bulletin, use of Grasp SC is subject to all use precautions and limitations imposed by the label affixed to the container for Grasp SC.

Directions for Use

Fields must be partially drained to expose weeds prior to application. Residual water remaining in the field does not adversely affect weed control so long as weeds are at least 70% exposed. For best results, soils should be moist at application and maintain good soil moisture after application by flushing or rainfall until establishment of permanent flood. Following an application of Grasp SC to a field with saturated soil or partially drained, wait at least 3 hours before beginning the establishment of the permanent flood. Following an application of Grasp SC to a field that is completely drained and the soil is dry, wait at least 3 days before beginning the establishment of the permanent flood. Reinfestation of some weeds may occur if a permanent flood is not established in a timely manner.
