

# GRAVITY® L 18-0-6

WITH PROPRIETARY BLEND TECHNOLOGY  
SLOW RELEASE NITROGEN LIQUID FERTILIZER

## GUARANTEED ANALYSIS

Total Nitrogen (N)*	18.0%
9.0% Urea Nitrogen	
9.0% Other Water Soluble Nitrogen	
Soluble Potash (K <sub>2</sub> O)	6.0%
Iron (Fe)	0.5%
0.5% Chelated Iron (Fe)	
Manganese (Mn)	0.2%
0.2% Chelated Manganese (Mn)	

Derived from: Urea, Methylene Urea, Potassium Acetate, Ferric Diammonium EDTA, and Manganese EDTA

\*9% Slowly Available Nitrogen from Methylene Urea

KEEP OUT OF REACH OF CHILDREN

## WARNING

Causes serious eye irritation. Causes skin irritation. Harmful if swallowed. Harmful in contact with skin. May cause damage to organs through prolonged or repeated exposure.

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle.

(If you do not understand the label, find someone to explain it to you in detail.)

## PRECAUTIONARY STATEMENTS

May cause an allergic skin reaction.

### FIRST AID

**IF INHALED:** remove person from contaminated area to fresh air and assist breathing as needed.

**IF INGESTED:** Seek medical attention or call a poison control center for treatment advice. Do not induce vomiting unless instructed to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

**IF IN EYES:** Flush eyes with clean water for 15 minutes. If present, remove contact lenses after 5 minutes and continue rinsing.

**IF ON SKIN:** Remove contaminated clothing and wash before re-using. Flush skin with water and wash with soap and water. SEEK MEDICAL ATTENTION IF ANY IRRITATION PERSISTS

### STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

**Storage:** Store in original container and keep container tightly closed when not in use. Keep away from heat, sparks and flames. PROTECT FROM FREEZING. SHAKE WELL BEFORE USE. Container

**Disposal:** Do not reuse container. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the web page at [www.agrecycling.org](http://www.agrecycling.org).

### **GENERAL INFORMATION:**

Gravity L 18-0-6 with Proprietary Blend Technology provides nitrogen, potassium, chelated iron, and chelated manganese to promote healthy plant growth. Gravity L 18-0-6 with Proprietary Blend Technology contains two forms of nitrogen: a readily available component which provides quick green-up and a controlled-release component which ensures a consistent and steady delivery that resists leaching. Gravity L 18-0-6 with Proprietary Blend Technology is a liquid fertilizer specifically formulated for all turf, ornamental, and horticultural applications.

### **DIRECTIONS FOR USE:**

#### **READ ENTIRE LABEL BEFORE USING**

Gravity L 18-0-6 with Proprietary Blend Technology can be mixed with most common pesticides. A jar test should be used to confirm compatibility. Gravity L 18-0-6 with Proprietary Blend Technology should not be mixed with strong acids as product degradation will occur and the fertilizer will precipitate. Gravity L 18-0-6 with Proprietary Blend Technology may be used on greens, tees, fairways, roughs and other turf areas composed of turfgrasses including, but not limited to: Bluegrass, Perennial Ryegrass, Tall Fescue, Annual Bluegrass, Bentgrass, Bahiagrass, St. Augustinegrass, Zoysiagrass, Centipedegrass, Seashore Paspalum, and Bermudagrass. For best results do not irrigate or mow until sprayed area has completely dried.

For Turfgrass Applications: Do not apply near water, storm drains, or drainage ditches. Do not apply if heavy rain is expected.

#### **GOLF COURSES**

Gravity L 18-0-6 with Proprietary Blend Technology should be applied at 1/16 to 1/2 lb of nitrogen (4.1 to 33 fl oz) per 1,000 square feet every 7 to 21 days as needed during the growing season. Spray volumes can range from 1 to 4 gallons per 1,000 square feet for adequate coverage.

#### **LAWNS AND OTHER TURF AREAS**

Cool Season Grasses: Apply 2 to 5 lbs of nitrogen per 1,000 square feet per year in multiple applications. Individual nitrogen application rates may vary from 1/4 to 1 lb of nitrogen (16.5 to 66 fl oz) per 1,000 square feet.

Warm Season Grasses: Apply 3 to 8 lbs of nitrogen per 1,000 square feet per year in multiple applications. Individual nitrogen application rates may vary from 1/4 to 1 lb of nitrogen (16.5 to 66 fl oz) per 1,000 square feet.

#### **TREES AND ORNAMENTALS**

Apply 1.5 to 3.5 lbs of nitrogen per 1,000 square feet of landscaped area in a minimum of two applications. For container grown products apply a foliar spray or soil drench at a rate of 1 to 2 gal per 100 gals of water.

#### **BACKPACK SPRAYER**

Mix 4 to 6 fl. oz of product per gallon of water.

## WITH PROPRIETARY BLEND TECHNOLOGY SLOW RELEASE NITROGEN LIQUID FERTILIZER

### OVERHEAD IRRIGATION SYSTEMS

Gravity L 18-0-6 with Proprietary Blend Technology can be directly siphoned into a proportioner for use in irrigation systems.

When using overhead irrigation, the product can be absorbed by the leaf and what is not absorbed by the leaf will enter the soil for availability to the roots. For tender or sensitive plants, use 1/2 of the nitrogen rate that you would use with conventional plants.

Gravity L 18-0-6 with Proprietary Blend Technology Fl. Oz. per 1000 sq. ft.	N rate Lbs/1000 sq. ft.
4.1	1/16
8.3	1/8
16.5	1/4
33.0	1/2
49.5	3/4
66.0	1

A number of variables influence the rate of application necessary to prevent or correct a specific deficiency. For best results, follow good agronomic practices and conduct soil and tissue tests. Additional fertility may need to be supplied from other sources. For specific recommendations for your plants, consult your state's recommendations or your local plant expert.

### SPRAY COVERAGE AND DRIFT CONTROL

To optimize spray coverage or deposition, and to reduce drift, include Droplex adjuvant.
