FIRST AID

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first five minutes, then continue rinsing. Call a poison control center or doctor for treatment advice if irritation persists.

If on skin: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

DIRECTIONS FOR USE

Soil: For normal soils use 16 oz. per acre with irrigation water. For compacted soils or for water penetration problems, use 32 oz. per acre, on first application. Repeat application at 16 oz. per acre rate if necessary.

Row Crops: Can be metered into first irrigation water or mixed with starter or side dress fertilizer.

Trees and Vines: Dilute in sufficient water for coverage and meter into first irrigation water through drip irrigation system or spray soil surface to be irrigated if drip irrigation is not used.

Transplants: Mix with transplant water to apply one 16 oz. per acre.

Plants: Use four fluid ounces per 100 gallons of water to reduce surface tension and improve wetting in agricultural sprays. If foaming is a problem, use an anti-foam agent in the spray formulation or fertilizer solution.
