

Grower's Secret

PROTEIN HYDROLYSATE NPK FERTILIZER

GROWER'S SECRET GRANULES 8-3-1

Plant Nutrient for soil application in Agriculture and Horticulture

8-3-1

Guaranteed Analysis

Total Nitrogen (N)	8.0%
5.0% Water Soluble Nitrogen	
3.0% Water Insoluble Nitrogen	
Available Phosphate (P_2O_5)	3.0%
Soluble Potash (K_2O)	1.0%
Calcium (Ca)	2.0%
Derived from: soy protein hydrolysate, soft rock phosphate, and seaweed.	

F1840

STORAGE: Store in the original container in a cool, dry place away from excessive moisture and heat. Reseal container after each use.

CAUTION: May be harmful if swallowed. Avoid contact with eyes, skin, open cuts and sores. KEEP OUT OF REACH OF CHILDREN AND PETS. Wash hands after use. For general clean up use warm soapy water.

NOTICE: Buyer assumes all responsibility for safety and use not in accordance with label directions.

Use in organic crop production to promote greener looking plants. Suitable for use on all plant types as a soil fertilizer. Can be applied to all organic and conventional crops to correct or prevent nitrogen, phosphate and potassium deficiencies.

Grower's Secret Granules 8-3-1 (GSG831) is a protein hydrolysate product that can be applied by ground to soil to promote plant growth and prevent or correct nitrogen, phosphate and potassium deficiencies that could limit growth and yields. GSG831 is nontoxic to plants when applied as directed. For best results, apply GSG831 according to recommendations based on plant or soil analysis for a given crop.

DIRECTIONS FOR USE:

Agricultural and Horticultural crops: Grower's Secret Granules 8-3-1 (GSG831) is a dry prill product that can be applied through most granular applicators. Check with your implement dealer if you have questions on calibration. Application rates and timing of applications will vary. Consult your Certified Crop Advisor and make applications based on crop and soil analysis for a given crop.

Lawn and garden: Mix 1/4 cup per gallon of soil or spread 1/2 cup of prills over a 1 square yard (meter) area and incorporate into the top 3 inches of soil. The fertilizer needs water to become available to the plant. Reapply as needed.

Recommended rates are intended as a guideline only and may not be suitable for all regions, conditions, and crops. Specific application rates should be determined from crop and soil analysis.
