

Grower's Secret

For the prevention and correction of Iron Deficiency

VitalVit Fe 5-0-0

Guaranteed Analysis

Total Nitrogen (N)	5.0%
4.21% Water Soluble Nitrogen	
0.79% Water Insoluble Nitrogen	
Iron (Fe)	12.0%
Derived from: Ferrous sulfate and Soy Protein Hydrolysate.	F1840

STORAGE: Store in the original container in a cool, dry place away from excessive moisture and heat. Reseal container after each use.

CAUTION: KEEP OUT OF REACH OF CHILDREN AND PETS. May be harmful if swallowed. May be harmful or cause eye irritation. Avoid breathing dust or spray mist. Avoid contact with eyes, skin, open cuts and sores. Wash exposed skin after use. For general clean up use warm soapy water.

NOTICE: Buyer assumes all responsibility for safety and use not in accordance with label directions.

VitalVit Fe is a fertilizer based on enzyme digested hydrolyzed proteins and iron designed to prevent or correct nutrient deficiencies that may limit crop growth, yield and/or quality. Suitable for use on all organic and conventionally produced plants.

VitalVit Fe can be applied by ground or aerial application as a spray or through a drench, drip, micro emitter or flood irrigation application. It is nontoxic to plants when applied as directed. Physical compatibility in mixtures needs to be evaluated. For best results apply VitalVit Fe according to recommendations based on plant tissue or soil analysis for a given crop. Soil deficiency must be documented by testing.

MIXING/USE INSTRUCTIONS: Mix well in the desired amount of water for a single application. VitalVit Fe is compatible with most other fertilizers and plant nutrients. It is however recommended that a physical and plant compatibility test be conducted before use. A physical mixing test using small quantities in proportion to field application rates is recommended. Perform a phytotoxicity test on a small plot before large scale application. To lower the risk of phytotoxicity applications should be made early morning or late evening.

DIRECTONS FOR USE: Apply in sufficient water to uniformly cover the desired area. Use of a wetting agent is not normally needed. The application rate and timing will depend on the crop, stage of growth, environmental conditions and severity of deficiency. Higher use rates are needed for larger plants and more severe deficiencies. Multiple applications can be made as needed based on tissue and soil analysis for a given crop. VitalVit Fe can be used on all crops including broad acre and row crops, vegetables, fruit trees, vines and tree nuts.

FOLIAR APPLICATIONS: Apply 1/2 to 1 pound per acre. Apply to plant foliage to the point of runoff throughout the growing season as needed.

SOIL APPLICATIONS: Apply 1-3 pounds per acre to the soil as a spray or through irrigation including drip and sprinkler. If applied to the soil surface, irrigate well.

Net wt. 1 lb. (0.45 kg) Net wt. 5 lbs. (2.27 kg) Net wt. 50 lbs. (22.68 kg) Net wt. 1225 lbs. (555.65 kg) Net wt. ____ lbs. (____ kg)

NOTICE OF WARRANTY – Grower's Secret warrants that the product conforms to its chemical description as is reasonable for the purposes stated on the label when used in accordance with directions under normal conditions of use. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other material or manner of use or application, all of which are beyond the control of Growers Secret. In no case shall Grower's Secret be liable for consequential, special or indirect damages resulting from the use or handling of this product. Growers Secret makes no warranties of merchantability or fitness for a particular purpose nor any other express or implied warranty except as stated above.
