Use in organic gardening to promote greener looking plants. Suitable for use on all plant types as a foliar and soil fertilizer. Can be applied to all organic and conventional crop production to promote greener plants and to correct or prevent Nitrogen deficiencies.

Grower's Secret Liquid Nitrogen 8-0-0 (GSN8) is a protein hydrolysate product that can be applied by ground or air applications or through irrigation to prevent or correct nitrogen deficiencies that could limit growth and yields. GSN8 is nontoxic to plants when applied as directed. For best results, apply GSN8 according to recommendations based on plant or soil analysis for a given crop.

MIXING INSTRUCTIONS: Mix well in the desired amount of water. GSN8 is believed to be compatible with most fertilizers, plant nutrients and pest control products except with products containing high levels of calcium such as Can 17. When mixing with other products it is recommended that a physical compatibility test be conducted before mixing. A test using small quantities in proportion to field application rates is recommended. Since lack of phytotoxicity on all crops has not been confirmed, test mixtures on a small portion of the field before wide spread application.

DIRECTIONS FOR USE: Agricultural and Horticultural Crops: Apply 1-5 quarts (0.95-4.7 L) per acre for soil applications and 1-2 quarts (0.95-1.9 L) per acre as a foliar application.

Lawn and garden: Mix 1.0 fl. oz. (30 ml. of fertilizer) per gallon of water. Apply as a foliar spray, soil drench, or through irrigation systems every 2-4 weeks or as needed.

Recommended rates are intended as a guideline only and may not be suitable for all regions, conditions, and crops. Specific application rates should be determined from crop and soil analysis.

Density: 10.44 lbs/gallon (4.74 kg/3.785 liters) @ 68° F

☐ 32 fl. oz. (.95 L) Net wt. 2.61 lbs. (1.18 kg) ☐ 55 gallons (208.2 L) Net wt. 574 lbs. (260 kg) ☐ 275 gallons (1041 L) Net wt. 2871 lbs. (1302 kg)
