HI-PHITE

0-60*-0 PHOSPHITE FERTILIZER

F1898

Guaranteed Analysis

Total Phosphoric Acid (P_2O_5)..... **60.00%**

Derived From: Phosphorous Acid

General Information:

HI-PHITE 0-60*-0 is a concentrated, water soluble soil applied nutrient solution containing certain elements beneficial to the plant growth and development. HI-PHITE 0-60*-0 is for use as a supplemental treatment to a regular fertility program and will not supply the total nutrients required by a crop. Upon foliar application, the phosphite ions are taken up directly by the plant foliage and may undergo a degree of conversion to phosphate ions, or will be used directly by plants, as a phosphite ions. As a soil application to annual crops, a lesser response from initial crop, with a corresponding superior response from succeeding crops may be observed. In addition, placement close to seeds or root zones may be injurious to crops. The effect may be aggravated by a soil pH below 6.5.
