HERBOR-G

Non-Selective Herbicide
for Use in Organic &
Conventional Production

For Organic Use

Active Ingredients

Clove Oil.....	70%
Inert Ingredients.....	30%
TOTAL:	100%

C8-18 mono and diesters of 1, 2, 3 propanetriol, Water, Lauric Acid, Octanoic Acid, potassium salt, Butyl Stearate, Vinegar, Sodium Sulfate, Citric Acid, Silica (hydrate), Glycerol, Urea, Sodium Chloride, Mineral Oil.

HERBOR-G™ has not been registered with the United States Environmental Protection Agency. HERBOR-G™ is exempt from federal registration under section 25(b) of the Federal Insecticide, Fungicide and Rodenticide Act.

KEEP OUT OF REACH OF CHILDREN - CAUTION

HERBOR-G™ is a contact, non-selective, broad spectrum, foliar-applied herbicide. It will only control actively growing green vegetation. It provides burn down of both annual and perennial broadleaf and grass weeds. The degree of burn down and longevity of control is less when plants are inactive, mature or biennial/perennial types. HERBOR-G™ is not translocated. It will burn only those plant parts that are coated with spray solution.

HERBOR-G™ can be applied through most standard or field type sprays after dilution and mixing with water in accordance with label instructions. For best results, spray coverage should be uniform and complete. Visible effects on most weeds occur within hours.

HERBOR-G™ does not damage mature, non-green, woody parts of plants. Cool weather following treatment may slow the activity of this product and delay or reduce visual effects. HERBOR-G™ provides no residual weed control. Repeat treatments will be necessary for new plants emerging from seed or regrowth of treated vegetation.
