

FIFRA

Section 2(ee) Recommendation

Date: March 19, 2013

Products: Heritage® Fungicide
EPA Registration No. 100-1093

Use: Addition of Pythium Root Dysfunction (*Pythium volutum*) as disease controlled on golf course greens

State: NY

This recommendation is made under the authority of FIFRA Section 2(ee) and recommends an application of Heritage Fungicide to golf course greens at the recommended rates in the above states.

The user must refer to the federally approved labels for the above noted product and read and follow all directions for use, restrictions, and precautions.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Apply 0.4 oz /1000 sq ft on a 21-28 day application interval for control of Pythium root dysfunction on golf course greens. Apply preventatively when mean daily soil temperatures are between 55°F and 70°F. Irrigate with 0.1" to 0.2" within 24 hours after application to facilitate movement into the root zone.

Follow all directions for use, restrictions and precautions as given on the federal label.

The user must have this recommendation in its possession at the time of use.

This recommendation for use of Heritage Fungicide is permitted under Section 2(ee) of FIFRA and has not been submitted to or been approved by EPA.
