 8.00% Combined Sulfur (S)

Derived from: Ammonium Polyphosphate, Potassium Thiosulfate.

ALSO CONTAINS NON-PLANT FOOD INGREDIENT:

2.5% Organic Matter (derived from Leonardite)

DIRECTIONS FOR USE

- Shake well before use. • Designed to be applied by both soil and/or foliar application. • 38 SPECIAL® should be applied when turf or ornamental tissue and soil analysis identifies the need and proper rate of application for this product. • Best results will be obtained when application is concentrated in the active root zone or on the leaf surface.
- Can be applied in combination with compatible plant growth regulators, pesticides, or other liquid fertilizers. • If compatibility is in question, jar test a small quantity. • Apply foliar sprays with sufficient water to ensure uniform coverage without running off leaf surfaces.
- Do not apply this product foliarly in concentrations greater than 5%.
- For maximum results, apply in the early morning or in the evening when air temperatures are optimum for foliar application. • Do not apply HUMA GRO® TURF nutrients during the hottest time of the day or to turf or ornamentals under drought or flood stress. • Application timing, intervals and rates may vary according to turf and ornamental requirements, stage of development, available nutrient levels in the soil, and overall nutritional status of the plants. • Applications can be made as often as every 7 to 10 days as needed. • Consult your local HUMA GRO® TURF Representative or other turf or ornamental specialist for plant-specific recommendations. • Do not store this product below 50°F (10°C) or above 90°F (30°C).

This product is intended as a supplement to a regular fertilization program and will not, by itself, provide all the nutrients normally required by turf and ornamentals.

STORAGE AND DISPOSAL:

Keep product in original container. Do not transfer into food or drink containers. Triple rinse container when empty for recycling. Always dispose of container in accordance with local, state and/or federal regulations.
