DIRECTIONS FOR USE

- Shake well before use.
- Designed to be applied to the soil.
- FERTIL HUMUS® should be applied when soil analysis identifies the need and proper rate of application for this product.
- Best results will be obtained when application is concentrated in the active root zone. For ornamentals, first application should be 15 to 20 days before planting, bud break or root flush or at the onset of dormancy. For turf and sod, apply directly onto turf thatch or organic materials followed by light irrigation.
- Can be applied in combination with compatible plant growth regulators, pesticides, or other liquid fertilizers.
- If compatibility is in question, jar test a small quantity.
- Do not apply this product in concentrations greater than 10%.
- Do not apply HUMA GRO® TURF nutrients during the hottest time of the day or to plants under drought or flood stress.
- Applications can be made as often as every 15 to 20 days as needed.
- Soil moisture is required for maximum bioactivity. If soil is dry, moisture should be provided by irrigation.
- Consult your local HUMA GRO® TURF Representative or other turf or ornamental specialist for specific recommendations.
- Do not store this product below 50°F (10°C) or above 90°F (30°C).

This product is intended as a supplement to a regular fertilization program and will not, by itself, provide all the nutrients normally required by turf and ornamentals.

STORAGE AND DISPOSAL:

Keep product in original container. Do not transfer into food or drink containers. Triple rinse container when empty for recycling. Always dispose of container in accordance with local, state and/or federal regulations.
