GENERAL INFORMATION

- Hye Hume is a modified potassium humate. Made by a *patented process. * U.S. Patent Nos. 5,663,425
- Hye Hume may aid in the uptake of micronutrients.

Compatibility can be simply checked by:

- Mixing each product in a clear container in the same proportion to be used in the field
- Agitating vigorously for at least 30 seconds
- Visually observing for precipitate

DIRECTIONS FOR USE

Hye Hume can be applied to all crops including fruits, vegetables, trees, vines, flowers, ornamentals, turf, grain and other row crops.

Application rates and frequency are dependent upon soil and climate conditions present. Typical application rates range from 1/2 to 2 gallon per crop per acre.

Hye Hume may be applied alone or with liquid fertilizers.

Hye Hume may be applied through conventional methods but not limited to foliar spray, soil application, drip irrigation (applied after the irrigation filters), water run, shanking in or hydroponically.

Follow the labeled rates for nutrients and/or consult with your local PCA.
