GENERAL INFORMATION

Impact PK is a foliar nutritional spray which is intended to be used as a supplement to a regular fertilizer program. Caution should be used when trying this product for the first time. Because of varying conditions over which the manufacturer has no control, including weather, the use of other pesticides and fertilizers and variability within the species, it is recommended that the user conduct limited field tests before broad scale use.

DIRECTIONS FOR USE + APPLICATION RATES

When applied by concentrate or dilute ground sprayers, use with a minimum of 15 gal of water per acre. When used in aerial applications, use at least 5 gal of water per acre. Control drift of this or other agricultural sprays.

This product should be applied alone, if possible. Do not combine with highly alkaline materials such as lime, sulfur, or dormant spray oils. Spraying concurrently with zinc or other metals should be avoided. However, if it is to be tank mixed, a simple jar test should be conducted to test for compatibility. Mixing with certain other compounds could result in an incompatible mix.
