- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- All applicable directions, restrictions, and precautions on the EPA registered label are to be followed.
- This labeling must be in the possession of the user at the time of pesticide application.
- This recommendation is made as permitted under FIFRA §2(ee) and has not been submitted to or approved by the EPA.

CROP	PEST	RATE Lbs/acre	COMMENTS
Almonds	Oriental Fruit Moth	4 1/3 – 5 1/3	In California only, to obtain optimum navel orangeworm control in the spring application, proper timing of sprays should be coordinated with effective use of a navel orangeworm monitoring system. Late season treatments must be applied before hull split reaches 10%.
	<ul style="list-style-type: none">• Do not make more than 2 applications per season as a foliar spray.• Do not prune for 7 days following an application of Imidan.• Nuts must be harvested mechanically.• Do not enter or allow entry into treated areas during the restricted entry interval (REI) of 3 days.
