

INDEPENDENCE

0-0-1

GUARANTEED ANALYSIS

Soluble Potash (K_2O).....1.0%
Derived from potassium chloride

GENERAL INFORMATION: Independence is for use in soil, foliar and water run applications, in combination with other nutrients. It is intended to be a supplement to a fertility program. Always monitor crop nutrient needs and responses with a soil, leaf tissue and irrigation water analysis program.

DIRECTIONS FOR USE

WATER RUN APPLICATIONS:

Independence is primarily designed for applications in combination with fertilizers. When applying this material via a fertigation system, continue to operate the system 30-60 minutes after material has completely injected to flush clean water through the system.

SOIL APPLICATIONS:

Independence is primarily designed for applications in combination with fertilizers. Soil apply via mechanical application through direct spray or injection to the soil (banded, side dress). Mix in clean tank with sufficient water for adequate mixing and coverage of target areas. Independence can also be impregnated into dry fertilizer blends.

FOLIAR APPLICATIONS:

Independence may be foliar applied. In a clean spray tank, add any dry powders and water and agitate. Add liquid Fertilizers and Independence last, continuing agitation. Always add Independence to tank before adding pesticides. Always use enough water for uniform application and to prevent possible plant tissue damage to the intended crop from concentrated droplets. Contact your Source to Source representative for rates when using low-volume and electrostatic sprayers. Apply during the cool part of the day, or when temperatures below 85° F. Do not apply under windy conditions, or other conditions that promote fast drying of leaf surfaces.

DIRECTIONS FOR USE CONTINUED...

COMPATIBILITY:

This product has an acidic pH and is compatible with most commonly applied nutrients and crop protection products. Contact a Source To Source representative for a list of compatible mixes. Jar test for compatibility prior to mixing with any pesticides, fertilizers or fertilizer blends. For unfamiliar mixes, an appropriate amount of the final mix should be applied to a small area of the intended crop to ensure plant compatibility prior to the planned application. User assumes full responsibility to ensure product, equipment and plant compatibilities.

STORAGE AND DISPOSAL:

Store in a sealed container in cool, dry location, at temperatures above freezing. Triple rinse and dispose of containers according to local and federal regulations.

SUGGESTED APPLICATION RATES & TIMINGS

SOIL AND WATER RUN APPLICATIONS:

All Crops:

Apply 1 quart - 2 gallons per acre in combination with other nutrients.

FOLIAR APPLICATIONS:

All Crops:

Apply 1/2 - 1 quart per acre per acre in combination with other nutrients.

NOTICE: Seller warrants that this product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with directions under normal conditions of use. Buyer shall assume all risks of use including, but not limited to crop injury, ineffectiveness or other unintended consequences as may result because of such factors as weather conditions, presence of other materials or the manner of use or application, all of which are beyond the control of the seller. In no case shall Source to Source be liable for consequential, special or indirect damages resulting from the use or handling of this product. Independence™ is a trademark product of Source to Source, Tulare CA. This label is for use in California. For use in other states please contact your Source to Source dealer, as labels may vary by state. Always refer to the label on the product before use.
