EPA 24(c) Special Local Need Registration SLN IN-110004
For Distribution and Use Only Within the State of Indiana

Postplant Application in Corn

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Instinct™ nitrogen stabilizer before applying. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.
- Use of Instinct according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Instinct.

Directions for Use

Apply 18 to 35 fl oz of Instinct per acre as a postplant application in corn. The application may be injected, dribbled, or applied as a band with sidedress liquid fertilizer. Instinct may also be impregnated onto dry fertilizer and applied.

Restrictions:

- Any postplant application of Instinct must be applied prior to V6 stage of growth.
- Do not apply more than 70 fl oz of Instinct (1 lb ai nitrapyrin) per acre per year on corn.
- **Replant restriction:** See label affixed to the container for Instinct.
