

EPA REG. NO. 73806-1

FIFRA 2(ee) RECOMMENDATION FOR USE IN CALIFORNIA

This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by the U.S. Environmental Protection Agency.

GENERAL APPLICATION INSTRUCTIONS

- It is a violation of Federal law to use this product inconsistent with its labeling.
- This recommendation must be in the possession of the user at the time of pesticide application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered labels.

COMPATIBILITY

Mixing K-PHITE 7LP with certain surfactants, foliar fertilizers or other pesticides may cause crop injury. K-PHITE 7LP is a slightly acidic to neutral buffer solution, pH range of 6.8 - 7.0. Avoid mixing K-PHITE 7LP with strongly acidic or alkaline materials. Do not tank mix without first testing the mixture's compatibility nor apply it without assessing its safety to the crop (phytotoxicity). Manufacturer does not assume liability as it is not possible to test all material combinations and environmental tank mix combinations. Always conduct a test with the intended tank mix on a small area prior to any large-scale applications. To determine if a combination is phytotoxic to a specific crop, spray a small area of foliage and fruit, and then evaluate 3-7 days later for visual symptoms. Test the compatibility of spray adjuvants (i.e. stickers, spreaders, wetting agents) with K-PHITE 7LP before use. Acidifying type compatibility agents may be used in conjunction with K-PHITE 7LP, however the reduction or increase in pH levels in conjunction with certain products may result in phytotoxicity. WHEN ADDING ACIDIFYING AGENTS ALWAYS BE AWARE OF POTENTIAL PHYTOTOXICITY ON THE SPECIFIC CROP AND EVALUATE PRIOR TO SPRAYING. To determine the compatibility of K-PHITE 7LP with other products, use a jar compatibility test. Add the correct proportions of each product and the appropriate quantity of water to clean container, thoroughly mix, then let stand for 3-5 minutes. If the mixture remains in solution or can be remixed readily, the products are considered compatible.

All applicable directions, restrictions, and precautions on the EPA-registered label are to be followed. This FIFRA Section 2(ee) recommendation contains new or additional information regarding COMPATIBILITY, which may not appear on the package label. Read and observe the cautionary statements plus all other information appearing on the product label.
