PRODUCT INFORMATION

KICKER is a highly active ammonium sulfate solution designed to enhance herbicide performance by modifying solution pH and water hardness. The ammoniacal nitrogen in *KICKER* has been found to promote herbicide (such as glyphosate) uptake in agricultural applications. *KICKER*'s use of high-quality spray grade ammonium sulfate eliminates cold water sedimentation and nozzle plugging commonly found with dry AMS. *KICKER* also contains a pH stable antifoam which prevents foaming during tank mixing.
