PRODUCT INFORMATION

KRISTOL™ should be used to improve the performance of various post-emergent herbicides where a nitrogen solution and surfactant are required.

Many post-emergent herbicides perform best when the spray mix contains a water conditioner and a quality surfactant. KRISTOL provides both functions in a convenient formula. KRISTOL replaces the need for 28% nitrogen solution and nonionic surfactants. When used at the recommended rates, KRISTOL can increase the performance of various herbicides that require combinations of the above additives.

NOT FOR AQUATIC USE.

DIRECTIONS FOR USE

Rates of KRISTOL may vary with the conditions of applications. Fill spray tank one half (1/2) full with water. Add the proper amount of KRISTOL and pesticide. Add the remainder of water. Bypass agitation is sufficient when using KRISTOL, but it should be continued until the full mixture has been sprayed.

Use 2-6 quarts of KRISTOL per 100 gallons of spray mixture. KRISTOL may be used with herbicides where ammonium sulfate is recommended. Use the higher rates when hard water conditions exist. Always follow the adjuvant use recommendations as shown on the pesticide label.

DO NOT ADD THIS PRODUCT AT A RATE WHICH EXCEEDS 5% OF THE FINISHED SPRAY VOLUME.

NOTE: If the pesticide manufacturer's label requires a certain volume-to-volume (v/v) percentage of surfactant, then include a nonionic surfactant as needed in addition to KRISTOL. The nonionic surfactant must contain at least 80% surfactant.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage and disposal.

STORAGE: Store in original container only and keep tightly closed. Store locked up in closed storage areas. Store in a well-ventilated place. Use caution when moving, opening, closing or pouring.

PRODUCT DISPOSAL: Dispose of contents in accordance with all government regulations. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of federal law. Wastes resulting from use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER HANDLING: Dispose of container in accordance with all government regulations. Triple rinse (or equivalent), then offer for recycling, if available, or reconditioning, if appropriate. Alternatively, puncture and dispose of the container in a sanitary landfill, or by other procedures approved by state and local authorities. Recycling cleaned containers is the best option of container disposal. ACRC (Agricultural Container Recycling Council) operates a national recycling program. To contact your state and local ACRC recycler, visit the ACRC web page at www.acrecycle.org.
