## Kerb® 50-W

EPA Reg. No. 62719-397

SLN OR-990007

### Weed Control in Established Orchardgrass Grown for Seed

(For Distribution and Use Only in the State of Oregon)

**Expiration Date:** This label is valid until December 31, 2016, or until otherwise amended, withdrawn, canceled, or suspended.

**ATTENTION**

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This label must be in the possession of the user at the time of pesticide application.
- Read this SLN label and the label affixed to the container for Kerb® 50-W herbicide before applying. Follow all other applicable directions, restrictions, and precautions on the EPA-registered label.
- Use of Kerb 50-W according to this SLN label is subject to all use precautions and limitations imposed by the label affixed to the product container.

**Active Ingredient:**

pronamide: 3,5-dichloro-N-(1,1-dimethyl-2-propynyl)-benzamide .....	50.0%
Other Ingredients .....	50.0%
Total .....	100.0%

## CAUTION

---

### Precautionary Statements

---

#### Hazards to Humans and Domestic Animals

**Causes Moderate Eye Irritation**

**Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling.**

#### Environmental Hazards

Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwaters.

---

## Directions for use

---

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read all Directions for Use carefully before applying.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your state or tribe, consult the agency responsible for pesticide regulation.

### General Information

Kerb<sup>®</sup> 50-W herbicide is effective for the control and/or suppression of undesirable seedling grasses.

**NOTE:** *Due to the close proximity of native prairie remnants to agricultural areas and the potential for these areas to be adversely affected by herbicides through drift or possible runoff/soil movement, Kerb 50-W should not be applied directly to native prairie habitats. It is recommended that dosage rates be maintained at the lower end of the use rate range (if effective seedling control can be achieved) in a further effort to lessen potential impacts to endangered species.*

### Weeds Controlled (Suppression)

Kerb 50-W will provide preemergence and postemergence control/suppression of the following seedling weeds when used according to label directions:

Bromus Species	<i>Bromus species</i>
Wild Oat	<i>Avena species</i>
Annual Ryegrass	<i>Lolium multiflorum</i>
Volunteer Orchardgrass	<i>Dactylis glomerata.</i>

### Application Rate

Apply a single application of Kerb 50-W at a rate of 0.5 to 0.75 lb (0.25 to 0.375 lb ai) per acre for preemergence and postemergence control/suppression of undesirable seedling grasses in established orchardgrass fields that have produced at least one seed crop. Application should be made during the fall or early winter months (November through mid-January), once the fall rains have moistened the soil and the soil temperature is 55°F or less. Applications must be completed by mid-January. Do not apply more than 0.75 lb (0.375 lb ai) of Kerb 50-W per acre during any one season.

Do not apply Kerb 50-W to sandy or gravelly areas or fields under stress due to drought, flooding, excessive fertilizer, soil salts, cold temperatures, hail, injury from previously applied pesticides or injury due to insects or diseases, as excessive injury may result.

### Specific Use Restrictions

The following use restrictions must be observed when Kerb 50-W is used as recommended on this label:

- **Chemigation:** Do not apply this product through any type of irrigation system.
- Read and observe all label directions before using. All applicable directions, restrictions, Worker Protection Standard requirements and precautions on the EPA registered product label must be followed.
- Do not graze livestock in treated fields within 180 days of application.
- Do not apply Kerb 50W herbicide within 180 days of harvesting grass hay.
- Kerb 50-W should only be applied using ground application equipment.
