

RESTRICTED USE PESTICIDE

Because pronamide has produced tumors in laboratory animals, this product is for retail sale to and use only by Certified Applicators or persons under their direct supervision, and for only those uses covered by the Certified Applicator's certification.

Dow AgroSciences LLC 9330 Zionsville Road Indianapolis, IN 46268-1054 USA

**FIFRA Sec. 24(c) Special Local Need Labeling
For Distribution and Use Only in the State of Oregon**

Weed Control in Fall, Carbon-Seeded Grasses (Orchardgrass, Tall Fescue, Perennial Ryegrass) Grown for Seed

Kerb® 50-W

EPA Reg. No. 62719-397 OR-990008

Expiration Date: This label is valid until December 31, 2017, or until otherwise amended, withdrawn, canceled, or suspended.

Directions for Use

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This state-specific Section 24(c) labeling must be in the possession of the user at the time of pesticide application.
- Follow all applicable directions, restrictions, and precautions on the EPA registered label for EPA Reg. No. 62719-397

Active Ingredient:

pronamide: 3,5-dichloro-N-(1,1-dimethyl-2-propynyl)-benzamide	50.0%
Inert Ingredients	50.0%
Total	100.0%

CAUTION

Precautionary Statements

Hazards to Humans and Domestic Animals

Causes Moderate Eye Irritation

Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling.

Environmental Hazards

Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwaters.

Directions for use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read all Directions for Use carefully before applying.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your state or tribe, consult the agency responsible for pesticide regulation.

General Information

Kerb® 50-W herbicide has been demonstrated to be effective for the control and/or suppression of undesirable seedling grasses.

NOTE: *Due to the close proximity of native prairie remnants to agricultural areas and the potential for these areas to be adversely affected by herbicides through drift or possible runoff/soil movement, Kerb 50-w herbicide should not be applied directly to native prairie habitats. It is recommended that dosage rates be maintained at the lower end of the use rate range (if effective seedling control can be achieved) in a further effort to lessen potential impacts to endangered species.*

Weeds Controlled (Suppression)

Kerb 50-W herbicide will provide preemergence and postemergence control/suppression of the following seedling weeds when used according to label directions:

Bromus Species	<i>Bromus species</i>
Wild Oat	<i>Avena species</i>
Annual Ryegrass	<i>Lolium multiflorum</i>
Volunteer Orchardgrass	<i>Dactylis glomerata.</i>

Application Rate

Prior to application of Kerb 50-W, ensure that an adequate activated carbon band (one inch wide or greater) to absorb the herbicide applied is present on a well-prepared, firmly packed seedbed that is free of clods. After seeding/carbon banding operation, apply a single application of Kerb 50-W at 0.25 to 0.5 lb (0.125 to 0.25 lb ai) per acre tank mixed with a reduced rate of diuron. Application must be made before the emergence of the seeded crop and before rainfall dissipates the carbon band applied. Consult your local Extension Service agent or crop consultant for specific application rate recommendations for Kerb, diuron, and the activated charcoal on a field by field basis. **The grower assumes all risks of crop injury or stand loss when unforeseen environmental conditions (such as heavy rain soon after application), poor seedbed preparation or application rates/positioning, result in crop damage.** The greatest risk of injury or stand loss occurs when applications are made to poor drained soils and heavy rains occur soon after application.

Do not apply Kerb 50-W to sandy or gravelly areas or fields under stress due to drought, flooding, excessive fertilizer, soil salts, cold temperatures, hail, injury from previously applied pesticides or injury due to insects or diseases, as excessive injury may result.

Specific Use Restrictions

The following use restrictions must be observed when Kerb 50-W is used as recommended on this label:

- **Chemigation:** Do not apply this product through any type of irrigation system.
- Read and observe all label directions before using. All applicable directions, restrictions, Worker Protection Standard requirements and precautions on the EPA registered product label must be followed.
- **Do not** graze livestock in treated fields within 180 days of application.
- **Do not** apply Kerb 50W herbicide within 180 days of harvesting grass hay.
- Kerb 50-W should only be applied using ground application equipment.
