Fast Acting Nitrate Nitrogen and Double Cations: Calcium and Magnesium

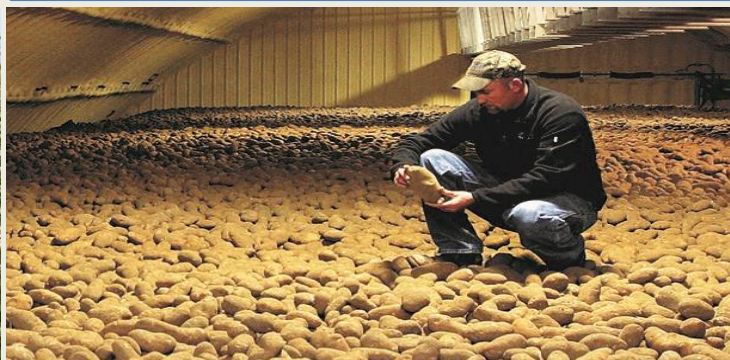

3 Nutrients in 1 Solution

- Nitrate Nitrogen is readily absorbed by plants and does not need to undergo any further conversion.
- Nitrate Nitrogen promotes uptake of cation nutrients, while Ammonium nitrogen competes with them.
- Proper ratios of Calcium and Magnesium improve soil structure and water infiltration.
- Calcium and Magnesium improve disease resistance in fruit and vegetable crops.
- Proper Calcium and Magnesium nutrition helps reduce internal disorders and improves storability of Potato, Onion and Carrot crops.

Crop Removal of Magnesium

<i>Potatoes:</i>	<i>30 tons remove approximately</i>	40 # Mg
<i>Onions:</i>	<i>20 tons remove approximately</i>	58 # Mg
<i>Corn:</i>	<i>180 Bu. remove approximately</i>	55 # Mg
<i>Alfalfa:</i>	<i>8 tons remove approximately</i>	40 # Mg
<i>Wheat:</i>	<i>70 Bu. remove approximately</i>	18 # Mg
