

FIFRA SECTION 24(c) SPECIAL LOCAL NEED (SLN) LABEL
**FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF OREGON
FOR CONTROL OF SPOTTED WING DROSOPHILA IN BLUEBERRIES AND
CANEBSERRIES**

**MALATHION 8 AQUAMUL
Organophosphate Insecticide**

Loveland Products, Inc.

EPA REG. NO. 34704-474

EPA SLN NO. OR-130013

Active Ingredient:% BY WT.
Malathion
(O, O-Dimethyl phosphorodithioate of diethyl mercaptosuccinate):.....81.8%
Other ingredients:.....18.2%
Total:.....100.0%

This label is valid until December 31, 2022 or until otherwise amended, withdrawn, canceled, or suspended.

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This SLN label and the EPA registered product label must be in the possession of user at the time of pesticide application. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on this Special Local Need (SLN) and on the EPA-registered label for Malathion 8 Aquamul (EPA Reg. No. 34704-474).

ENVIRONMENTAL HAZARDS

This pesticide is toxic to aquatic organisms, including fish and invertebrates.

This product may contaminate water through drift of spray in wind. This product has a high potential for runoff after application. Use care when applying in or to and area which is adjacent to any body of water, and do not apply when weather conditions favor drift from target area. Poorly draining soils and soils with shallow water tables are more prone to produce runoff that contains this product.

A level, well-maintained vegetative buffer strip between areas to which this product is applied, and surface water features such as ponds, streams, and springs, will reduce the potential for contamination of water from rainfall runoff. Runoff of this product will be reduced by avoiding applications when rainfall is forecasted to occur within 48 hours.

Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or rinsate. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters, or surface waters.

Pollinator Protection: This pesticide is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drive to blooming crops or weeds while bees are actively visiting the treatment area.

For commercial, industrial, and institutional use products packaged in containers equal to or greater than 5 gallons:

Do not discharge effluent containing this product into lakes, streams, ponds estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

DIRECTIONS FOR USE

BLACKBERRIES, BOYSENBERRIES, DEWBERRIES, LOGANBERRIES, RASPBERRIES

Pests controlled	Rate in pt/A (lb ai/A)	Directions	Pre-Harvest Interval (PHI)
Spotted Wing Drosophila	Up to 2.0 (2.0)	<ul style="list-style-type: none"> • The maximum application rate is 2.0 lbs AI/A (2.0 pts Malathion 8 Aquamul / A). • The maximum number of applications per year is 4. • Do not exceed a total maximum use rate of malathion from all sources of 8.0 lbs AI/A per YEAR. • The minimum retreatment interval is 7 days. • The Restricted Entry Interval (REI) is 12 hrs • For use under this SLN label, do not apply this product through any type of irrigation system. 	1 Day

BLUEBERRIES

Pests controlled	Rate in pt/A (lb ai/A)	Directions	Pre-Harvest Interval (PHI)
Spotted Wing Drosophila	Up to 2.5 (2.5)	<ul style="list-style-type: none"> • The maximum application rate is 2.5 lbs AI/A (2.5 pts Malathion 8 Aquamul / A) • The maximum number of applications per year is 2. • Do not exceed a total maximum use rate of malathion from all sources of 5.0 lbs AI/A per season. • The minimum retreatment interval is 7 days. • The Restricted Entry Interval (REI) is 12 hrs • For use under this SLN label, do not apply this product through any type of irrigation system. 	1 Day

IMPORTANT: This product is sold subject to the Conditions of Sale and Warranty and Liability Limitations set forth on the container label.
