**TURF HERBICIDE**

- Kills Nutgrass down to the root.
- Safe to established turf & landscape when used as directed.
- Easy handling formulation.

**CONTROLS:**

- Yellow and Purple Nutgrass and other listed weeds

**Nutgrass Eliminator**

*Easy on grass tough on Nutsedge*

**NET CONTENTS:** 0.5 OUNCES (13.5 GRAMS)

**ACTIVE INGREDIENT:**

| Halosulfuron-methyl, methyl 3-chloro-5-(4,6-dimethoxypyrimidin-2-ylcarbamoylsulfamoyl)-1-methylpyrazole-4-carboxylate | 5.0% |
| Other Ingredients | 95.00% |
| **TOTAL:** | 100.0% |

**EPA Reg. No.** 91234-69-53883

**EPA Est. No.** 53883-TX-00

**KEEP OUT OF REACH OF CHILDREN**

**CAUTION**

See enclosed booklet for Precautionary Statements and Directions for Use.

**FIRST AID**

If in eyes

- Hold eye open and rinse slowly and gently with water for 15-20 minutes.

- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

- Call a poison control center or doctor for treatment advice.

**HOT LINE NUMBER**

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact SafetyCall at 1-844-685-9173 for emergency medical treatment information.

**Manufactured For:**

Control Solutions Inc.

**EASY 3-STEP APPLICATION**

1. **POUR** Combine entire packet with one gallon of water.

2. **MIX** Shake or stir to mix well.

3. **SPRAY** Spray on all affected areas. Rainfast within 4 hours.

Nutgrass Eliminator is not manufactured, or distributed by Gowan Company, LC, seller of SedgeHammer® +.
**Nutgrass Eliminator**

**Turf Herbicide**

A selective herbicide for the control of nutseed and other weeds in turfgrass, ornamentals, landscaped areas, and other specified non-crop areas.

**ACTIVE INGREDIENTS:**

Halosulfuron-methyl, methyl 3-chloro-5-(4-chloro-2-methylpyrimidin-2-yl)carboxylate

(% by weight)  
Halosulfuron-methyl, methyl 3-chloro-5-(4-chloro-2-methylpyrimidin-2-yl)carboxylate  
- 95.00%  
95.00%  
5.00%  

**NET CONTENTS:** 8.5 ounces (23.5 grams)

**FIRST AID**

If in eyes
- Hold eye open and rinse slowly and gently with water for 15 – 20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

If swallowed
- Rinse mouth vigorously with plenty of water.
- If an oral burning sensation develops, drink plenty of water.
- Call a poison control center or doctor for treatment advice.

If on skin
- Wash thoroughly after handling.
- Call a poison control center or doctor for treatment advice.

If on clothing
- Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

**KEEP OUT OF REACH OF CHILDREN**

**CAUTION**

Causes moderate eye irritation. Avoid contact with eyes or clothing.

**PERSONAL PROTECTIVE EQUIPMENT (PPE)**

Applicators and other handlers must wear:

- Long-sleeved shirt and long pants.
- Long-sleeved shirt and long pants.
- Short plus socks

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

**ENGINEERING CONTROLS**

When handlers use closed systems, mix in closed tanks, or in other closed containment equipment that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides (40 C.F.R. Part 190). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

- Avoid applications when rainfall is forecasted to occur within 4 hours.
- Do not apply when wind speeds exceed 10 miles per hour at the application site.
- Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours.

**UNIQUE IMPLEMENTATION REQUIREMENTS**

- Always use the specific protective equipment to be worn at the time of application as specified in the WPS.
- All handlers must meet the training requirements in the WPS.
- This product may be used on established seeded, sodded, or sprigged turfgrass. Allow the turf to become established on a weathered root zone.

**USER SAFETY RECOMMENDATIONS**

Users should:

- Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
- Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

**ENVIRONMENTAL HAZARDS**

This product is toxic to non-target vascular plants. Do not apply to non-target vascular plants, including weeds, crops, or plants on ornamental and turfgrass lawns. Do not apply to irrigated and non-irrigated areas. Do not apply to ornamental and turfgrass lawns. Do not apply to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwaters.

**SPRAY DRIFT**

**APPLICATION EQUIPMENT**

- Always use the specific protective equipment to be worn at the time of application as specified in the WPS.
- This product may be used on established seeded, sodded, or sprigged turfgrass. Allow the turf to become established on a weathered root zone.

**RECOMMENDATIONS**

- Always use the specific protective equipment to be worn at the time of application as specified in the WPS.
- Do not apply this product by air.
- Do not apply this product in a manner inconsistent with its labeling.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe please contact your local regulatory agency.

**AGRICULTURAL USE REQUIREMENTS**

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 C.F.R part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard. 40 C.F.R part 170. Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours.

PPE required for entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water is:

- Coveralls,
- Gloves,
- Skin plus socks, and
- Chemical-resistant gloves made out of any waterproof material.

**NON-AGRICULTURAL USE REQUIREMENTS**

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 C.F.R Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

- Keep people off treated areas until spray solution has dried.

**PRODUCT INFORMATION**

Nutgrass Eliminator is a selective herbicide for postemergence control of species such as purple and yellow nutgrass. Kyllinga species and certain broadleaf weeds (see weeds controlled chart). Nutgrass Eliminator can be applied to commercial and residential lawns and on other non-crop sites including: airports, campgrounds or areas responsible for wooded areas in landscape areas, faigiards, follow areas, fruit, fuel storage areas, golf courses, landscaped areas, lumbems, public recreation areas, race tracks, residential property, rights-of-ways, roadides, school grounds, sports fields, tennis courts and tennis courts.

This product is toxic to plants and may adversely impact the forage and habitat of non-target organisms, including pollinators, in areas adjacent to the treated area. Protect the forage and habitat of non-target organisms by minimizing spray drift. For further guidance and instructions on how to minimize spray drift, refer to the Spray drift Management section of this label.

**WEED RESISTANCE MANAGEMENT**

Nutgrass Eliminator is a Group 2 herbicide (ALS/AHAS inhibitors). Any weed population may contain or develop plants naturally resistant to Nutgrass Eliminator and other Group 2 herbicides.

- Suspected herbicide-resistant weeds may be identified by these indicators:
  - Failure to control a weed species normally controlled by the herbicide at the dose applied, especially if control is achieved on adjacent weeds;
  - A spreading patch of non-controlled plants of a particular weed species; and
  - Surviving plants mixed with controlled individuals of the same species.

To delay herbicide resistance:

- Avoid the consecutive use of Nutgrass Eliminator or other target site of action Group 2 herbicides. If a herbicide with a similar target site of action, on the same weed species is used, use different dates of application and be both effective at the tank mix or pre-peak rate on the weed(s) of concern (an herbicide mode of action classification by itself may not adequately address specific weeds that are resistant to specific herbicides)
- Base herbicide use on a comprehensive Integrated Pest Management (IPM) program.
- Scout fields prior to application to identify the weed species present and their growth stage to determine if the intended application will be effective.
- Scout fields after application to verify that the treatment was effective.
- Contact your local extension specialist, certified crop advisors and/or manufacturer for herbicide resistance management and/or integrated weed management recommendations for specific crops and resistant weed biotypes.

Report any incidence of non-performance of this product against a particular weed species to your Attila, LLC retailer, representative or call 884-664-8064. If resistance is suspected, treat weed escapes with an herbicide having a different mechanism of action and/or use non-chemicals means to remove escapes, as practical, with the goal of preventing further seed production.

**IMPORTANCE OF DROPLET SIZE**

**IMPORTANCE OF DROPLET SIZE**

**SPRAY DRIFT**

**APPLICATION EQUIPMENT AND INSTRUCTIONS**

- Boom-less Ground Applications:
  - Applications are required to use a Medium or coarser droplet size (JASSE S572.1) for all applications.
  - Do not apply when wind speeds exceed 10 miles per hour at the application site.
  - Do not apply during temperature inversions.

**SPRAY DRIFT ADVISORIES**

- Take precautions to minimize spray drift.

**USE PRECAUTIONS**

- For optimum results, do not mow turf for 2 days before or 2 days after application.
- Avoid applicators when rainfall is forecasted to occur within 4 hours.
- This product may be used on established seeded, sodded, or sprigged turfgrass. Allow the turf to develop a good root system and uniform stand before application.
- Treated areas may be overseeded with annual or perennial ryegrass or bermudagrass, 2 weeks after application.
- Avoid application of Nutgrass Eliminator when turfgrasses or nutgrass is under stress since turf injury and poor nodule control may result.
- Avoid excessive overlap of the spray.
- Annual and perennial herbaceous ornamentals, including color plants, may be injured when transplanted into landscaped areas treated with Nutgrass Eliminator.

**USE RESTRICTIONS**

- Do not store Nutgrass Eliminator in solution. Once the product is mixed with water apply immediately.

- Do not apply as an over the top spray to desirable flowers, ornamentals, vegetables, shrubs or trees.
- Do not apply this product to golf course putting greens.
- Do not apply this product through any type of irrigation system.
- Do not apply this product by air.
- Do not apply this product using ground boom equipment.
### TURFGRASS (INCLUDING COMMERCIAL AND RESIDENTIAL TURFGRASS, GOLF COURSES, ESTABLISHED LAWNS, AND ORNAMENTAL TURFGRASS)

<tbody>
<tr>
<td>0.5 oz (13.5 grams) or 1 pouch</td>
<td>Mix in 1 gallon of water</td>
<td>Apply Nutgrass Eliminator for postemergence control of purple or yellow nutsedge, Kyllinga and broadleaf weeds. Mix 0.5 oz (13.5 grams) of this product (1 pouch) in 1 gallon of water to treat 1000 sq. ft. of turfgrass. Mix or shake the solution to ensure ingredients are completely dispersed. Spray the target weeds thoroughly and wet the entire leaf surface of the undesirable plants. For best results, spray nutsedge after it has reached the 3-6 leaf stage of growth. For optimum Kyllinga control 2 applications are recommended.</td>
</tr>
<tr>
<td>1 oz (27 grams) or 2 pouches</td>
<td>Mix in 1 gallon of water</td>
<td>For postemergence control of horsetail apply 1 oz (27 grams) of this product (2 pouches) in 1 gallon of water to treat 1000 sq. ft. after horsetail has leafed out. Note: This rate of product will control horsetail that is less than 6 inches tall and suppress horsetail that is greater than 6 inches tall.</td>
