## Section 2(ee) Recommendation

Date: June 7, 2011

Products: Avicta® Duo Corn (EPA Reg. No. 100-1321) or  
Avicta® Duo 250 Corn (EPA Reg. No. 100-1353)

Use: Tank Mix with Maxim® Quattro (EPA Reg. No.100-1352) for additional protection from nematode damage in field corn, sweet corn, and popcorn.

States: CO, FL, IA, ID, IL, IN, KS, LA, MI, MN, MO, MS, ND, NE, OH, PA, SD, VA, WA, WI

This is a recommendation of FIFRA Section 2(ee) as it relates to the use of Avicta Duo Corn or Avicta Duo 250 Corn in a tank mix with Maxim Quattro for additional protection from nematode damage in field corn, sweet corn, and popcorn. The user must refer to the federally approved labels and read and follow all directions for use, restrictions, and precautions.

### Directions for Use

It is violation of federal law to use this product in a manner inconsistent with its labeling.

Avicta Duo Corn or Avicta Duo 250 Corn may be applied at labeled rates in a tank mix with Maxim Quattro at labeled rates for use on field corn, sweet corn, and popcorn.

Maxim Quattro contains the fungicide active ingredient, thiabendazole. This active ingredient acts as a fungicide and it also has nematicidal activity. Tank-mixing Maxim Quattro with Avicta Duo Corn or Avicta Duo 250 Corn can provide corn seedlings additional protection from damage caused by nematodes.

---

**The user must refer to the federally approved labels and read and follow all directions for use, restrictions, and precautions. It is a violation of federal law to use these products in a manner inconsistent with its labeling. The user should have this recommendation in their possession at the time of use.**

Use of this product according to this bulletin has not been reviewed or endorsed by the Office of the Indiana State Chemist.

This recommendation is made as permitted by Section 2(ee) of FIFRA, as amended, and has not been submitted to or approved by the EPA.
