**General Information:**

**MICRO-NUTS MIX** is recommended to provide Boron, Copper, Iron, Manganese, Molybdenum and Zinc as plant micronutrients and to correct and prevent their deficiencies. It is recommended before any mix to conduct a jar test and check the stability of the solution. It can be applied in combination with other fertilizers and chemicals as a foliar or directly to the soil.

**Application guide lines**

**FOLIAR APPLIED - MICRO-NUTS MIX** as a foliar application is absorbed quickly and efficiently by the leaves. Use sufficient spray volume to ensure coverage. Refer to the suggested rate range, which may vary according to crop stage and crop condition. Best performance is obtained when crops have an adequate supply of water. Concentration at low water volume should never be more than 0.5 lbs/Acre. **SOIL APPLIED** - Apply higher rates when soil has enough moisture content. For light soils, reduce the application rates and increase the number of applications.

CROPS	SOIL APPLIED Every 2-3 weeks	FOLIAR APPLIED Every 2-3 weeks
Vegetable	0.5 to 4 lbs. / Acre	All crops: 0.25 – 2 lbs/Acre in adequate spray water volume for full coverage. Use a lower rate for lower water volume (5-10 gal). Use 1 to 1.25 lbs/Ac rate at a water volume of 50 gal/Acre. Utilize higher rates for higher water volume (100 gal and above).
Tree crops, All Fruits, Nuts	3 to 12 oz. per tree or 0.5 to 6 lbs. / Acre	
Vines and Citrus, Field Crops, Lawn and Turf	0.5 to 6 lbs. / Acre or 1-3 oz. / 1000 sq. ft.	

**WARNING:** This product contains Boron (B), the use of the fertilizing material in any crops other than those recommended may result in serious injury to the crop(s).  
**WARNING:** The application of fertilizing materials containing molybdenum (Mo) may result in forage crops containing levels of molybdenum (Mo), which are toxic to ruminant animals.
