

GENERAL INFORMATION

MICRO-PLUS Complexed Micronutrients are for soil and foliar* application. They are readily available and may be rapidly absorbed by the root system or foliage.

MICRO-PLUS Complexed Micronutrients are formulated to be used in Stoller liquid fertilizers (NITRO-PLUS, URA-CAL, FOLIZYME) and Nitrogen solutions. When used with polyphosphate containing fertilizers, dilute with nitrogen solution before addition. Broadcast or row applications are acceptable, although greater efficiency may be expected from row applications. Micronutrient deficiencies usually occur when plants are small; therefore, micronutrients should be added to the fertilizer at or before planting.

DIRECTIONS FOR USE

It may be a violation of law to use this product inconsistent with its labeling.

RECOMMENDED USES

Soil application of MICRO-PLUS COPPER can be incorporated in liquid fertilizer or applied separately. MICRO-PLUS COPPER can be coated on dry blend fertilizer to control dust in the blend plant and supply needed micronutrients. Contact Stoller Enterprises, Inc. to receive the necessary equipment and operating instructions.

Apply the following rates if you do not have a soil or leaf analysis:

Maintenance Application:	1 quart per acre
Moderate Micronutrient Deficiency:	0.5 to 1 gallon per acre
Heavy Micronutrient Deficiency:	1 to 2 gallons per acre

If you have a soil or leaf analysis recommendation, apply MICRO-PLUS IRON at the following rates:

Elemental Iron required by soil/leaf test	Quarts of Micro-Plus Iron	Pounds of Micro-Plus Copper Iron
1 lb	0.75	2.0
2 lbs	1.50	4.0
3 lbs	2.25	6.0
4 lbs	3.00	8.0
5 lbs	3.75	10.0
6 lbs	4.50	12.0
7 lbs	5.25	14.0
8 lbs	6.00	16.0
9 lbs	6.75	18.0
10 lbs	7.50	20.0

*Do not foliar apply more than 1 quart per acre per application
