Micro-SeaMix is designed for foliar use on all crops to prevent or correct micronutrient deficiencies. Foliar fertilization is intended to supplement standard ground fertility programs and will not by itself provide all nutrients normally required by agricultural crops.

Directions for Commercial Use:

Foliar: Apply 1 to 8 pints per acre with sufficient water for thorough coverage. For best results spray in early morning or late afternoon. Ground: Apply 1 to 4 quarts per acre. Ground application can be via conventional ground sprayer or metered through irrigation.

NOTICE: The application of fertilizing materials containing molybdenum (Mo) may result in forage crops containing levels of molybdenum (Mo) which are toxic to ruminant animals.

APPLICATION PRECAUTIONS:

Tank Mixes

Micro-SeaMix is compatible with many fertilizers and pesticides but a compatibility check is always recommended. Fill the tank ½ to 2/3 with water and begin agitation and add tank-mix partner products (surfactants, pesticides, etc.) to the tank based on manufacturer labeled instructions. Mixing order will depend on the tank-mix partners. If the tank-mix partners are sensitive to high pH, add Micro-SeaMix first to lower the pH of the spray solution. If the tank-mix partners are sensitive to low pH solutions, add Micro-SeaMix last and spray immediately after mixing. For adjuvants refer the tank-mix partner labels for the proper mixing order and adjuvant selection. If mixing with fixed copper based fungicides use the lowest labeled rate of Micro-SeaMix and ensure good drying conditions exist at time of application. Do not apply Micro-SeaMix in combination with citrus oils at more than 1 pt/ac or 0.25%, whichever is less or in combination with petroleum oils at more than 2 qts/ac or 1.0%, whichever is less.

Spray Applications

Do not apply Micro-SeaMix with any type of hand, pump or back-pack sprayer. Do not use hand gun type applicators. Contact Agro-K or your Crop Advisor with questions. Apply with proper and accurately calibrated spray equipment to dry plant surfaces to the point of wet with no run-off. Avoid applying to wet leaf and fruit surfaces. Avoid spraying at temperatures above 85F degrees at time of application during day light hours. For additional information regarding Agro-K products, tank-mixes and spray conditions contact your local Agro-K representative. User assumes full responsibility to ensure proper product, application equipment, environmental conditions and plant compatibilities exist prior to application.

WARRANTY

1.-The manufacturer guarantees and warrants that the content and the total net weight are as stated within lawful limits.
2.-Liability of Agro-K Corporation under this warranty or otherwise shall be limited to refund of the purchase price and such refund is expressly agreed by the buyer to be the exclusive remedy.
