3.0% Chelated Zinc	

Derived from Copper Citrate, Ferrous Citrate, Manganese Citrate, Zinc Citrate, Borax, Copper EDTA, Iron EDTA, Manganese EDTA and Zinc EDTA.

DIRECTIONS FOR USE

Optimum rate of application may vary with soil test or plant analysis recommendations. The general recommended rate is 2 to 4 quarts per acre (5 to 10 liters per hectare). Dilute MICROPAK ALFALFA with water or 10-34-0 solution and apply to soil as broadcast or banding. It can also be applied through irrigation water.

MIXING INSTRUCTIONS

Fill tank with water and/or fertilizer solution and agitate. Add recommended amount of MICROPAK ALFALFA and agitate until mix thoroughly.

CAUTION: This product contains boron.

LIMITED WARRANTY

Manufacturer or seller makes no warranty, whether expressed or implied, concerning the use of this product other than for the purposes indicated on the label. Neither manufacturer nor seller shall be liable for any injury or damage caused by this product due to misuse, mishandling, or any application not specifically described on the label.

CAUTION:

This fertilizer contains Boron which may be injurious to certain crops. Contact your local county agency or field consultant for further information.
