

FIFRA

Section 2(ee) Recommendation

Date: May 5, 2021

Product: Minecto® Pro
EPA Reg. No. 100-1592

Use: Control of Adult Root Weevils in Citrus

State: Florida

Directions for Use

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- The user must refer to the federally approved labels for the above noted product and read and follow all directions for use, restrictions, and precautions.
- The user should have this recommendation in its possession at the time of use.
- This recommendation for use of this product is permitted under Section 2(ee) of FIFRA and has not been submitted to or been approved by EPA.

Minecto Pro will provide control of adult root weevils when applied at the rate of 12 fl. oz/A.

To avoid illegal crop residues, Minecto Pro **must always** be mixed with a non-phytotoxic, non-ionic activator type wetting, spreading and/or penetrating spray adjuvant or horticultural oil (not a dormant oil) and applied as specified in the Citrus Crop Use Directions section of the Minecto Pro Section 3 label.

Applications should be timed to the most susceptible insect or mite pest stage at locally determined action thresholds, before populations reach damaging levels.

Thorough coverage is essential to obtain best results. Select a spray volume appropriate for the size of trees and density of foliage.

Apply this product diluted in a minimum volume of 30 gal/A by ground application. Under conditions such as high pest populations, dense foliage, or adverse application conditions (such as high temperatures), use a greater volume of water to ensure adequate coverage.

Do not apply this product by air for control of adult root weevils.
