

MOCKSI™
Plant Growth Regulator
EPA Reg. No. 71049-4

FIFRA 2(ee)
Recommendation

For use only in California

**Instructions for Reduced Treatment Rates to Increase Fruit Retention and
Increase Yield in Almonds**

For Agricultural Use Only
Emergency Medical Calls: CHEMTREC at 1-800-424-9300

- This recommendation is made as permitted under FIFRA 2(ee) and has not been submitted to or approved by EPA.
- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- Read the label on the package for Mocksi Plant Growth Regulator before applying. Observe all applicable precautions, restrictions and limitations as listed on the approved EPA label.
- The Section 2(ee) recommendation and the EPA registered label must be in the possession of the user at the time of pesticide application.

DIRECTIONS FOR USE:

To promote increased fruit retention and increased yield, apply Mocksi Plant Growth Regulator at 8 fl. ounces per 100 gallons in 100-200 gallons of spray solution per acre. Make a single application from 80% petal fall to the time when nutlet length averages 4–6 mm. To improve coverage, include a non-ionic surfactant suitable for PGR's on almonds in the spray mixture at no more than 0.1% (v/v) concentration.

CROP	APPLICATION RATE/100 GAL SPRAY MIX	SPRAY VOLUME (GPA)	CROP SPECIFIC INSTRUCTIONS
ALMONDS	8 FL. OZ. (2 Grams a.i.)	100-200	Make one application from 80% petal fall to time when nutlets length averages 4-6 mm.

RESTRICTIONS:

- Make only one application per year.
- Do not harvest fruit for 7 days after application.

This Section 2(ee) label contains new or additional directions for use which are recommended by KIM-C1, LLC.
