

AMMONOFOS 36G

30-6-0

Granular fertilizer

NUTRIENT FOR SOIL APPLICATION

NABTA - AMMONOFOS 36G is a nitrogen and phosphorus based fertilizer designed to treat and prevent nitrogen deficiency in all crops, ornamentals, and turf. NABTA-AMMONOFOS 36G provides both nitrate nitrogen and ammonium nitrogen. Non volatile nitrate nitrogen moves readily with soil water to the roots where it is immediately available for plant uptake. It is also valued by field crops, fruits and vegetable growers for its ability to provide an immediately available nitrate source of plant food.

APPLICATION

Nabta-ammonofos 36G adapts to a wide range of application method, including the following but not limited to: pre-plant broadcast, banding, side dressing. It is also broadcast on alfalfa and pasture stubble.

This product should be used in accordance with recommendations of a qualified individual or institution such as, but not limited to a certified crop advisor, agronomist or university extension publication, or apply according to recommendations in your approved nutrient management plan.

In the absence of such recommendations, the following table can be used as a guide for the product application:
